PART II

MOTIVE FUEL SALES

Published by Authority of

The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Public Finance and Transportation Division

Transportation Section

May, 1961
8504-525

Price 50 cents

Reports Published by the
Public Finance and Transportation Division
dealing with

ROAD TRANSPORT

Catalogue number	Title and Description	Price per copy
53-202	International Toll Bridges, Tunnels and Ferries—annual (approx. 12 pp.) Investment, revenues, expenses, traffic, employees, salaries and wages and accidents with list of facilities.....	.50
53-205	Motor Carriers—Freight (Common and Contract)—annual (approx. 43 pp.) Number of companies, investment, operating revenues and expenses, traffic, employees, salaries and wages, equipment and accidents, by provinces, by revenue groups and by type of operation.....	.75
53-206	Motor Vehicle Traffic Accidents—annual (approx. 71 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, etc., by provinces.....	.75
53-001	Motor Vehicle Traffic Accidents—quarterly (approx. 31 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, etc., by provinces. (A condensed monthly report of motor vehicle traffic accidents is published as a release in the Dominion Bureau of Statistics Daily Bulletin) (\$2 a year)	.50
53-215	Passenger Bus Statistics—annual (approx. 14 pp.) Number of companies, investment, operating revenues and expenses, employees, salaries and wages, equipment and accidents, by provinces.....	.50
53-002	Passenger Bus Statistics—Intercity and Rural—Bil. monthly (approx. 4 pp.) Number of companies, passengers carried, vehicle miles run, fuel consumed, revenue by provinces (\$1 a year)	.10
53-201	Road and Street Mileage and Expenditure—annual (approx. 15 pp.) Road and street mileages, construction, maintenance and administration expenditures on highways, bridges, ferries and urban streets, by provinces.....	.50
53-217	The Motor Vehicle: Part I—Rates and Regulations—annual (approx. 40 pp.) Size, weight and safety regulations, reciprocal highway agreements, fees, taxes and motor carrier regulations, and gasoline tax rate review, by provinces.....	.75
53-218	The Motor Vehicle: Part II—Motive Fuel Sales—annual (approx. 10 pp.) Gross and net sales of gasoline and net sales of diesel oil.....	.50
53-219	The Motor Vehicle: Part III—Registrations—annual (approx. 14 pp.) Registrations by type of vehicle, by provinces and municipalities.....	.50
53-220	The Motor Vehicle: Part IV—Revenues—annual (approx. 11 pp.) Provincial government revenues from registrations and gasoline taxes; and unsatisfied judgment fund data, by provinces.....	.50
53-216	Urban Transit—annual (approx. 20 pp.) Investment, revenues, expenses, passengers carried, vehicle miles run, fuel consumed, by electric car, trolley coach and motor bus; equipment, accidents, employees, salaries and wages.....	.50
53-003	Urban Transit—Bil. monthly (approx. 4 pp.) Number of companies, passengers carried, vehicle miles run, fuel consumed, and revenue by electric car, trolley coach and motor bus, by provinces (\$1 a year)	.10
53-004	Motor Transport Traffic: National Estimates—quarterly (approx. 12 pp.) Mileage, ton miles, weight of goods carried and revenues by commodity for for-hire and private intercity carriers (\$2 a year)	.50

Motor Transport Traffic

Each of the following series of eight annual reports provides statistics on mileage, fuel consumption, truck capacity, goods carried, ton miles, revenues and number of trucks by type of operation and gross vehicle weight groups.

53-207	Motor Transport Traffic: National Estimates (approx. 30 pp.).....	.75
53-208	Motor Transport Traffic: Atlantic Provinces (approx. 18 pp.).....	.50
53-209	Motor Transport Traffic: Quebec (approx. 12 pp.).....	.50
53-209F	Transports Routiers de Marchandises: Québec (approx. 12 pp.).....	.50
53-210	Motor Transport Traffic: Ontario (approx. 13 pp.).....	.50
53-211	Motor Transport Traffic: Manitoba (approx. 13 pp.).....	.50
53-212	Motor Transport Traffic: Saskatchewan (approx. 13 pp.).....	.50
53-213	Motor Transport Traffic: Alberta (approx. 14 pp.).....	.50
53-214	Motor Transport Traffic: British Columbia (approx. 13 pp.).....	.50

Subscription orders should be sent to the Information Services Division, Dominion Bureau of Statistics, Ottawa, Canada, with enclosed remittances made payable to the Receiver General of Canada.

THE MOTOR VEHICLE

1960

PART II

INTRODUCTION

As of 1960, the information formerly contained in the annual publications "The Motor Vehicle"—Catalogue No. 53-203 and the "Motor Vehicle—Preliminary Report of Registrations and Size, Weight and Safety Regulations"—Catalogue No. 53-204 has been consolidated into one annual report to be called "The Motor Vehicle"—This new report is to be produced in four separate parts as follows:

Part I—"Rates and Regulations"

Part II—"Motive Fuel Sales"

Part III—"Registrations"

Part IV—"Revenues"

Part I—"Rates and Regulations" will contain all information available regarding commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and an historical gasoline tax review, by provinces.

Part II—"Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by provinces.

Part III—"Registrations" includes provincial registrations of the main classes of motor vehicles; an historical table of total registrations and registrations, by municipality.

Part IV—"Revenues" shows provincial government revenues from the main classes of motor vehicles and from motive fuel taxes and unsatisfied judgment fund data.

Motive Fuel Sales

In this Part of the annual Motor Vehicle report, it is the intention to provide estimates of the total amount of motive fuel used by motor vehicles on Canadian public highways only. As the information is not available precisely in accordance with this concept, it has been necessary to approach the objective by the process of elimination, of the amount of motive fuel used for other purposes. From total or gross sales, which is defined as the total sales of all motive fuels including imports and exports, the following are subtracted to obtain net sales: tax exempt sales to the Federal Government and other consumers, exports and sales on which refunds are paid. Net sales are thus defined as sales on which a tax or taxes have been paid in full.

The resulting net sales data, are therefore considered to be equivalent to the actual amount of motive fuel used on Canadian public highways.

There is, however, included in net sales an undetermined amount of motive fuel which is taxable but not used on the public highways including in some provinces aviation gasoline, turbo fuel and motive fuels consumed by power boats. The total effect of these is, however, considered to be relatively insignificant.

Gross gasoline sales include sales of motor and tractor grades of gasoline, marked gasoline, aviation fuel and liquefied petroleum gases (propane, butane) etc. The total of gross gasoline sales differs from the total sales of motor gasoline reported in the "Refined Petroleum Products" publication produced by the Industry and Merchandising Division of the Dominion Bureau of Statistics as motor gasoline in this latter publication excludes aviation fuel and liquefied petroleum gases.

Data for the Northwest Territories were not available for 1960. As in previous years it was not possible to obtain diesel oil sales for Nova Scotia.

The chart on page 4 illustrates the vast growth in the consumption of gasoline in Canada over a period of 21 years. Rationing and the diversion of fuel to the armed forces account for the sharp decline which occurred during the war years, especially from 1942 to 1945.

Gross sales of gasoline in Canada, except the Northwest Territories, rose 6.3 per cent in 1960 to 3,916 million gallons from the 1959 comparable figure of 3,684 million gallons while net sales increased 5.4 per cent to 3,014 million gallons from 2,860 million gallons in the previous year. Net diesel oil sales, excluding Nova Scotia and the Northwest Territories, were 7.1 per cent higher at 125 million gallons compared with 117 million gallons in 1959. Gross and net gasoline sales and net diesel oil sales in the Northwest Territories in 1959 represented 0.2 per cent, 0.2 per cent and 2.5 per cent respectively of the Canada totals.

Gross sales of gasoline were greater in 1960 than in 1959 in all regions except the Yukon while net sales of gasoline rose in all areas except Prince Edward Island and the Yukon. Net sales of diesel oil were also greater in all regions except Newfoundland, Prince Edward Island and Quebec.

Table 5 shows net sales of gasoline by months. It should be noted that the net sales for a month are calculated by subtracting the sales on which tax was refunded during the month from the sales of gasoline on which tax was paid. These refunds could relate, in part, to sales made in previous months, thus slightly distorting the monthly net sales figures.

MOTIVE FUEL SALES

¹ Gross sales, less diesel oil exempt from tax or on which tax was refunded.

² Exports were included in net sales prior to 1957.

³ Northwest Territories included in 1958 and 1959 only.

⁴ Not taxed.

⁵ Included with gasoline.

⁶ Diesel oil consumed in Manitoba is taxable for certain uses under the "Motive Fuel Users Tax Act". The gallons shown represent only the amount on which the full fuel tax was paid and which therefore was used for highway transport purposes. Data for years prior to 1955 are not available.

1939—1961

THE MOTOR VEHICLE

1961

PART II

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are sub-titled as follows:

Part I—"Rates and Regulations"	53-217
Part II—"Motive Fuel Sales"	53-218
Part III—"Registrations"	53-219
Part IV—"Revenues"	53-220

Part I—"Rates and Regulations" contains all information available regarding commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and an historical review of gasoline and other motive fuel taxes, by provinces.

Part II—"Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by provinces.

Part III—"Registrations" includes provincial registrations of the main classes of motor vehicles; an historical table of total registrations and registrations by county and municipality.

Part IV—"Revenues" shows provincial government revenues from the main classes of motor vehicles and from motive fuel taxes together with an historical table of these revenues as well as unsatisfied judgment fund data.

Prior to 1960 the information in these four parts was contained in the annual publications "The Motor Vehicle"—Catalogue No. 53-203 and the "Motor Vehicle—Preliminary Report of Registrations and Size, Weight and Safety Regulations"—Catalogue No. 53-204.

Motive Fuel Sales

In this Part of the annual Motor Vehicle report, it is the intention to provide estimates of the total amount of motive fuel used by motor vehicles on Canadian public streets and highways only. As the information is not available in accordance with this concept, it has been necessary to approach the objective by eliminating the amount of motive fuel used for other purposes. From total or gross sales, which is defined as the total sales of all motive fuels including imports and exports, the following are subtracted to obtain net sales: tax exempt sales to the Federal Government and other consumers, exports and sales on which refunds are paid. Net sales are thus defined as sales on which a tax or taxes have been paid in full.

The resulting net sales data, are therefore considered to be equivalent to the actual amount of motive fuel used on Canadian public streets and highways. There is, however, included in net sales an indeterminate amount of motive fuel which is

taxable but not used on public streets and highways including in some provinces aviation gasoline, turbo fuel and motive fuels consumed by power boats. The total effect of these is, however, considered to be relatively insignificant.

Gross gasoline sales include sales of motor and tractor grades of gasoline, marked gasoline, aviation fuel and liquefied petroleum gases (propane, butane) etc. The total of gross gasoline sales differs from the total sales of motor gasoline reported in the "Refined Petroleum Products" publication produced by the Industry and Merchandising Division of the Dominion Bureau of Statistics as motor gasoline in this latter publication excludes aviation fuel and liquefied petroleum gases.

As in previous years statistics of diesel oil sales in Nova Scotia were not available.

The chart on page 4 illustrates the vast growth in the consumption of gasoline in Canada over a period of 22 years. Rationing and the diversion of fuel to the armed forces account for the sharp decline which occurred during the war years, especially from 1942 to 1945.

The following table presents a concise statistical picture of the growth in the sales of gasoline and diesel oil in Canada between the last two years.

	1961	1960	Percentage increase
	millions of gallons		
Gross sales of gasoline	4,038	3,922 ^r	3.0
Net sales of gasoline	3,140	3,017 ^r	4.1
Net sales of diesel oil ¹	143	129 ^r	10.9

¹ Excluding Nova Scotia.

Gross sales of gasoline were greater in 1961 than in 1960 in all regions except New Brunswick, Manitoba and Saskatchewan while net sales of gasoline rose in all areas except New Brunswick. Net sales of diesel oil (excluding Nova Scotia) were also greater in all regions during this period.

Table 5 shows net sales of gasoline by months. It should be noted that the net sales for a month are calculated by subtracting the sales on which tax was refunded during the month from the sales of gasoline on which tax was paid. These refunds could relate, in part, to sales made in previous months, thus slightly distorting the monthly net sales figures.

March 22, 1962.

¹ Gross sales, less diesel oil exempt from tax or on which tax was refunded.

² Exports were included in net sales prior to 1957.

³ Northwest Territories included from 1958.

⁴ Not taxed.

⁵ Included with gasoline.

⁶ Diesel oil consumed in Manitoba is taxable for certain uses under the "Motive Fuel Users Tax Act". The gallons shown represent only the amount on which the full fuel tax was paid and which therefore was used for highway transport purposes. Data for years prior to 1955 are not available.

PART II

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are sub-titled as follows:

Part I - "Rates and Regulations"	53-217
Part II - "Motive Fuel Sales"	53-218
Part III - "Registrations"	53-219
Part IV - "Revenues"	53-220

Part I - "Rates and Regulations" contains all information available regarding commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and a historical review of gasoline and other motive fuel taxes, by province.

Part II - "Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by province.

Part III - "Registrations" includes provincial registrations of the main classes of motor vehicles; a historical table of total registrations and registrations by county and municipality.

Part IV - "Revenues" shows provincial government revenues from the main classes of motor vehicles and from motive fuel taxes together with a historical table of these revenues as well as unsatisfied judgment fund data.

Motive Fuel Sales

In this Part of "The Motor Vehicle" report, it is the intention to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles on public streets and highways. As the information is not available in accordance with this concept, it has been necessary to approach the objective by eliminating the amount of motive fuel used for other purposes. From total or gross sales, including imports and exports, the following are subtracted to obtain net sales: tax exempt sales to the Federal Government and other consumers, exports and sales on which refunds were paid. Net sales are thus defined as sales on which a tax or taxes have been paid in full.

The resulting net sales data are considered to be approximately equivalent to the actual amount of motive fuel purchased in Canada for use on public streets and highways. The difference between the two is due to the inclusion in net sales of an indeterminate amount of motive fuel which is taxable but not used on public streets and highways, including in some provinces aviation gasoline and turbo fuel used by aircraft and motive fuels consumed by power boats. The total effect of this is, however, considered to be relatively insignificant.

Gross gasoline sales include sales of motor and tractor grades of gasoline, marked gasoline, aviation fuel and liquefied petroleum gases (propane, butane) etc.. The total of gross gasoline sales differs from the total sales of motor gasoline reported in the "Refined Petroleum Products" publication, produced by the Industry and Merchandising Division of the Dominion Bureau of Statistics, as motor gasoline in the latter publication excludes aviation fuel and liquefied petroleum gases.

As in previous years, statistics of diesel oil sales in Nova Scotia were not available.

The chart on page 4 illustrates the vast growth in the consumption of gasoline in Canada over a period of 23 years. Rationing and the diversion of fuel to the armed forces account for the sharp decline which occurred during the war years, especially from 1942 to 1945.

The following table presents a concise statistical picture of the growth in the sales of gasoline and diesel oil in Canada between the last two years.

	1961	1962	Percentage increase
	millions of gallons		
Gross sales of gasoline	4,038	4,270	5.7
Net sales of gasoline	3,140	3,315	5.6
Net sales of diesel oil ¹	143	154	7.7

¹ Excluding Nova Scotia.

Gross and net sales of gasoline in all regions were greater in 1962 than in 1961. Net sales of diesel oil (excluding Nova Scotia) also increased during this period in all areas except Prince Edward Island.

Tables 5 and 7 show respectively net sales of gasoline and diesel oil by month. The latter are included for the first time. It should be noted that the net monthly sales are calculated by subtracting the sales on which tax was refunded during a particular month from the sales for that month on which tax was paid. These refunds could relate, in part, to sales made in previous months, thus slightly distorting the monthly net sales figures.

April 16, 1963.

⁶ Data not available.

⁷ Includes all sales in Yukon until June, 1958 when breakdown for internal combustion purposes was available.

⁸ July to December only.

⁹ Excludes fuel used for other than highway purposes in all areas except Quebec.

¹⁰ April to December only.

THE MOTOR VEHICLE

1963

PART II

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are subtitled as follows:

Part I — "Rates and Regulations"	53-217
Part II — "Motive Fuel Sales"	53-218
Part III — "Registrations"	53-219
Part IV — "Revenues"	53-220

Part I — "Rates and Regulations" contains all information available regarding commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and a current review of gasoline and other motive fuel taxes, by province.

Part II — "Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by province.

Part III — "Registrations" includes provincial registrations of the main classes of motor vehicles; a historical table of total registrations and registrations by county and municipality.

Part IV — "Revenues" shows provincial government revenues from the main classes of motor vehicles and from motive fuel taxes together with a historical table of these revenues as well as unsatisfied judgment fund data.

Motive Fuel Sales

In this part of the "Motor Vehicle" report, it is the objective to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, wherever possible. The resulting net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline, marked gasoline, aviation fuels and liquefied petroleum gases. Diesel oil sales include both No. 1 and No. 2 grades of diesel oil.

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid,
- (d) Exports.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

- (a) No separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline,
- (b) No separation, in Quebec, between sales of diesel oil for "Motive" and "Other" purposes,
- (c) No data on diesel oil sales in Nova Scotia, and
- (d) No information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

However, with the co-operation of federal and provincial agencies and the increasing refinement of the reporting form and of the data available, the quality of this report is being steadily improved.

For example, Alberta has now provided a breakdown of liquefied petroleum gas sales by "use". This has enabled us to remove, from the 1963 report, sales of 127,586,126 gallons of liquefied petroleum gases used for industrial, manufacturing and domestic heat and power. As a result, gross gasoline sales in Alberta have shown a sharp decrease, although the net sales figures are unaffected because sales for these purposes were never taxed and therefore were not included in previous net sales figures.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report Refined Petroleum Products (Catalogue No. 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The Refined Petroleum Products Report provides total refinery sales figures for all finished petroleum products, while the Motive Fuel Sales Report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the Refined Petroleum Products Report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo-fuel. Although some of the other twelve classifications include certain amounts ultimately sold for

motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The chart, on page 4, illustrates the growth in the consumption of gasoline in Canada over the past 24 years.

The following table presents a concise comparison of the sales of motive fuels in Canada between 1962 and 1963. Data inclusive and exclusive of liquefied petroleum gases sold for industrial, manufacturing and domestic uses in Alberta are presented in order that the series may be linked at the year of change.

	1962	1963	Percentage change
	millions of gallons		(+) (-)
Gross gasoline sales:			
(a) Including all liquefied petroleum gas sales in Alberta	4,270	4,466	+ 4.6
(b) Excluding sales of liquefied petroleum gases for industrial, manufacturing and domestic consumption	4,125	4,338	+ 5.1
Net gasoline sales	3,315	3,564	+ 7.5
Net diesel oil sales	154	193	+ 25.3
Net motive fuel sales	3,469	3,757	+ 8.3

Gross sales of gasoline in most regions were greater in 1963 than in 1962; exceptions were Alberta, the Yukon and the Northwest Territories. Net sales also showed increases, except in New Brunswick which recorded a slight decline of sales. The relatively large increase in net diesel oil sales is due primarily to the continuing increase in the numbers of diesel-powered units being put into service by motor carriers of freight and by bus operators.

Tables 5 and 7 respectively, show net sales of gasolines and diesel oils by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

STATISTICAL TABLES

TABLE 1. Gross Sales of Gasoline, by Province, 1939, 1949, 1956-63
(for motive purposes)

No.	Province	1939	1949	1956	1957

Periodical		
53-001	Motor vehicle Traffic Accidents—quarterly (approx. 31 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, etc., by province. (A condensed monthly report of motor vehicle traffic accidents is published as a release in the Dominion Bureau of Statistics Daily Bulletin) (\$2 a year)	\$.50
53-002	Passengar Bus Statistics—Intercity and Rural—Bil. monthly (approx. 4 pp.) Number of companies, passengers carried, vehicle miles run, fuel consumed, revenue, by province..... (\$1 a year)	.10
53-003	Urban Transit—Bil. monthly (approx. 4 pp.) Number of companies, passengers carried, vehicle miles run, fuel consumed, and revenue by electric car, trolley coach and motor bus, by province (\$1 a year)	.10
53-004	Motor Transport Traffic: National Estimates—quarterly (approx. 12 pp.) Mileage, ton miles and weight of goods carried by commodity for for-hire and private intercity carriers (\$2 a year)	.50
53-005	Motor Carriers Freight—quarterly (approx. 4 pp.) Numbers of Class 1 and Class 2 companies, operating revenues and expenses and tonnages handled, by prov- ince (\$1 a year)	.25
Annual		
53-201	Road and Street Mileage and Expenditure (approx. 15 pp.) Road and street mileages, construction, maintenance and administration expenditures on highways, bridges, ferries and urban streets, by province50
53-202	International Toll Bridges, Tunnels and Ferries (approx. 12 pp.) Investment, revenues, expenses, traffic, employees, salaries and wages and accidents with list of facilities50
53-206	Motor Vehicle Traffic Accidents (approx. 71 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, etc., by province	1.00
53-215	Passenger Bus Statistics (approx. 14 pp.) Number of companies, investment, operating revenues and expenses, employees, salaries and wages, equipment traffic and accidents, by province50
53-216	Urban Transit (approx. 20 pp.) Investment, revenues, expenses, passengers carried, vehicle miles run, fuel consumed, by electric car, trolley coach and motor bus; equipment, accidents, employees, salaries and wages by province.....	.50
53-217	The Motor Vehicle: Part I—Rates and Regulations (approx. 40 pp.) Size, weight and safety regulations, reciprocal highway agreements, fees, taxes and motor carrier regulations, and gasoline tax rate review, by province75
53-218	The Motor Vehicle: Part II—Motive Fuel Sales (approx. 10 pp.) Gross and net sales of gasoline and net sales of diesel oil50
53-219	The Motor Vehicle: Part III—Registrations (approx. 14 pp.) Registrations by tupe of vehicle, by provincesand municipalities50
53-220	The Motor Vehicle: Part IV—Revenues (approx. 11 pp.) Provincial government revenues from registrations and gasoline taxes; and unsatisfied judgment fund data, by province.....	.50
53-221	Moving and Storage, Household Goods (approx. 12 pp.) Number of companies, investment, operating revenues and expenses, employees, salaries and wages, storage space and equipment, by province.....	.50
53-222	Motor Carriers—Freight (Common and Contract)—Part I Classes 1 and 2 (approx. 32 pp.) Number of companies, investment, operating revenues and expenses, employees, salaries and wages, equipment and accidents, by province, by revenue class and by type of operation50
53-223	Motor Carriers—Freight (Common and Contract)—Part II Classes 3 and 4 (approx. 16 pp.) See above for description50

Motor Transport Traffic

Each of the following series of eight annual reports provides
statistics on mileage, fuel consumption, truck capacity, goods
carried, ton miles, revenues and number of trucks by type of oper-
ation and gross vehicle weight group.

53-207	Motor Transport Traffic: National Estimates (approx. 30 pp.)50
53-208	Motor Transport Traffic: Atlantic Provinces (approx. 18 pp.).....	.50
53-209	Motor Transport Traffic: Quebec (approx. 12 pp.).....	.50
53-209F	Transport routiers de marchandises: Québec (approx. 12 pp.)50
53-210	Motor Transport Traffic: Ontario (approx. 13 pp.).....	.50
53-211	Motor Transport Traffic: Manitoba (approx. 13 pp.)50
53-212	Motor Transport Traffic: Saskatchewan (approx. 13 pp.)50
53-213	Motor Transport Traffic: Alberta (approx. 14 pp.).....	.50
53-214	Motor Transport Traffic: British Columbia (approx. 13 pp.)50

THE MOTOR VEHICLE

1964

PART II

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are subtitled as follows:

	Catalogue No.
Part I—"Rates and Regulations" ..	53-217
Part II—"Motive Fuel Sales"	53-218
Part III—"Registrations"	53-219
Part IV—"Revenues"	53-220

Part I—"Rates and Regulations" contains information available regarding private passenger and commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and current data on gasoline and other motive fuel taxes, by provinces.

Part II—"Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by provinces and by months.

Part III—"Registrations" includes provincial registrations of the main classes of motor vehicles; a historical table of total registrations and registrations by place of residence.

Part IV—"Revenues" shows provincial government revenues derived from the main classes of motor vehicles and motive fuel taxes. Also provided is a historical table of these revenues and data on the revenues, payments and limitations of the provincial motor vehicle accident claims funds.

Motive Fuel Sales

In this part of the "Motor Vehicle" report, it is the objective to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, wherever possible. The resulting net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline, marked gasoline and liquefied petroleum gases. It should be noted that the figures

have been revised back to and including 1960 and aviation and aviation turbo fuels excluded. For the years prior to 1960 aviation fuels are included. Diesel oil sales include both No. 1 and No. 2 grades of diesel oil.

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid,
- (d) Exports.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

- (a) No separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline.
- (b) No separation, in Quebec, between sales of diesel oil for "Motive" and "Other" purposes,
- (c) No data on diesel oil sales in Nova Scotia, prior to 1964, and
- (d) No information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

However, with the co-operation of federal and provincial agencies and the increasing refinement of the reporting form and of the data available, the quality of this report is being steadily improved.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report Refined Petroleum Products (Catalogue No. 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The Refined Petroleum Products report provides total refinery sales figures for all finished petroleum products, while the Motive Fuel Sales report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the Refined Petroleum Products report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo fuel. Although some of the other twelve classifications include certain amounts ultimately sold for motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The chart, on page 4, illustrates the growth in the consumption of gasoline in Canada over the past 25 years.

Gross sales of gasoline in all regions were greater in 1964 than in 1963; net sales also showed increases in all provinces and territories.

The increase in net diesel oil sales is due primarily to the continuing increase in the numbers of diesel-powered units being put into service by motor carriers of freight and by bus operators.

Tables 5 and 7 respectively, show net sales of gasolines and diesel oils by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

April 27, 1965.

STATISTICAL TABLES

TABLE 1. Gross Sales of Gasoline, by Province, 1939, 1949, 1957-64
(For motive purposes)

No.	Province	1939	1949	1957	1958

ROAD TRANSPORT

Catalogue number	Title Periodical	Price per copy
53-001	Motor vehicle Traffic Accidents—quarterly (approx. 34 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, by class of victim, by age group, by province. (A condensed monthly report of motor vehicle traffic accidents is published as a release in the Dominion Bureau of Statistics Daily Bulletin) (\$2 a year)	.50
53-002	Passenger Bus Statistics—Intercity and Rural—Bil. monthly (Class 1 Carriers only) (approx. 4 pp.) Number of companies, passengers carried, vehicle miles run, fuel consumed revenue, by province (\$1 a year)	.10
53-003	Urban Transit—Bil. monthly (Class 1 carriers only) (approx. 4 pp.) Number of companies, passengers carried, vehicle miles run, fuel consumed, and revenue by electric car, trolley coach and motor bus, by province (\$1 a year)	.10
53-004	Motor Transport Traffic: By Commodities—quarterly (approx. 10 pp.) Mileage, ton miles and weight of goods carried by commodity for for-hire and private intercity carriers (\$2 a year)	.50
53-005	Motor Carriers Freight—quarterly (approx. 4 pp.) Numbers of Class 1 and Class 2 companies, operating revenues and expenses and tonnages handled, number of employees, salaries and wages, by province (\$1 a year)	.25
Annual		
53-201	Road and Street Mileage and Expenditure (approx. 22 pp.) Road and street mileages, construction, maintenance and administration expenditures on highways, bridges, ferries and urban streets, by province, federal contributions for Trans-Canada Highway, expenditure of grade crossings50
53-202	International Toll Bridges, Tunnels and Ferries (approx. 12 pp.) Investment, revenues, expenses, traffic, employees, salaries and wages and accidents with list of facilities50
53-206	Motor Vehicle Traffic Accidents (approx. 71 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, by class of victim, by age group, by type of vehicle, by class of accident, etc., by province	1.00
53-215	Passenger Bus Statistics (approx. 19 pp.) Number of companies, investment, operating revenues and expenses, employees, salaries and wages, equipment, traffic accidents, fuel consumption, property account, taxes, by province50
53-216	Urban Transit (approx. 14 pp.) Balance sheet, investment, revenues, expenses, passengers carried, vehicle miles run, fuel consumed, by electric car, trolley coach and motor bus, equipment, accidents, employees, salaries and wages by province50
53-217	The Motor Vehicle: Part I—Rates and Regulations (approx. 40 pp.) Size, weight and safety regulations, reciprocal highway agreements, taxes and motor carrier regulations, gasoline tax rate review, passenger cars, trucks and buses annual licence fees by province75
53-218	The Motor Vehicle: Part II—Motive Fuel Sales (approx. 13 pp.) Gross and net sales of gasoline and net sales of diesel oil by province, by year50
53-219	The Motor Vehicle: Part III—Registrations (approx. 18 pp.) Registrations of motor vehicles by major groups 1903-64, by type of vehicle, drivers' licences, by province, registrations by place of residence50
53-220	The Motor Vehicle: Part IV—Revenues (approx. 11 pp.) Provincial government revenues from registrations and motive fuel taxes: and unsatisfied judgment fund data, by province50
53-221	Moving and Storage Household Goods (approx. 16 pp.) Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, storage facilities and equipment, fuel consumption and Canadian taxes, by province50
53-222	Motor Carriers—Freight (Common and Contract)—Part I Classes 1 and 2 (approx. 36 pp.) Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, equipment and accidents, by province, by revenue class and by type of operation75
53-223	Motor Carriers—Freight (Common and Contract)—Part II Classes 3 and 4 (approx. 22 pp.) Number of companies, balance sheet operating revenues and expenses, employees, salaries and wages, equipment and accidents, by province, by revenue class and by type of operation50
63-212	Warehousing (General Merchandising and Refrigerated Goods) (approx. 10 pp.) Number of companies, property, operating and income accounts, employees compensation, storage facilities, truck equipment, by province50

Motor Transport Traffic

Each of the following series of eight annual reports provides statistics on mileage, fuel consumption, truck capacity, goods carried, ton miles, revenues and number of trucks by type of operation and gross vehicle weight group.

53-207	Motor Transport Traffic: Canada (approx. 30 pp.)50
53-208	Motor Transport Traffic: Atlantic Provinces (approx. 24 pp.)50
53-209	Motor Transport Traffic: Quebec (approx. 13 pp.)50
53-209F	Transport routiers de marchandises: Québec (approx. 13 pp.)50
53-210	Motor Transport Traffic: Ontario (approx. 13 pp.)50
53-211	Motor Transport Traffic: Manitoba (approx. 13 pp.)50
53-212	Motor Transport Traffic: Saskatchewan (approx. 13 pp.)50
53-213	Motor Transport Traffic: Alberta (approx. 13 pp.)50
53-214	Motor Transport Traffic: British Columbia (approx. 13 pp.)50

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Services Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

NET SALES OF DIESEL OIL IN CANADA

1939 - 1965

THE MOTOR VEHICLE

1965

PART II

MOTIVE FUEL SALES

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are subtitled as follows:

	Catalogue No.
Part I—"Rates and Regulations"	53-217
Part II—"Motive Fuel Sales"	53-218
Part III—"Registrations"	53-219
Part IV—"Revenues"	53-220

Part I—"Rates and Regulations" contains information available regarding private passenger and commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and current data on gasoline and other motive fuel taxes, by provinces.

Part II—"Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by provinces and by months.

Part III—"Registrations" includes provincial registrations of the main classes of motor vehicles; a historical table of registrations, by province, and registrations by place of residence.

Part IV—"Revenues" shows provincial government revenues derived from the main classes of motor vehicles and motive fuel taxes. Also provided is a historical table of these revenues and data on the revenues, payments and limitations of the provincial motor vehicle accident claims funds.

Motive Fuel Sales

In this part of the "Motor Vehicle" report, it is the objective to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, wherever possible. The resulting net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline, marked gasoline and liquefied petroleum gases. For the years prior to 1960 aviation fuels are included. Diesel oil sales include both No. 1 and No. 2 grades of diesel oil.

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid,
- (d) Exports.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

(a) No separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline,

(b) No data on diesel oil sales in Nova Scotia, prior to 1964, and

(c) No information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

However, with the co-operation of federal and provincial agencies and the increasing refinement of the reporting form and of the data available, the quality of this report is being steadily improved.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report Refined Petroleum Products (Catalogue No. 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The Refined Petroleum Products report provides total refinery sales figures for all finished petroleum products, while the Motive Fuel Sales report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the Refined Petroleum Products report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo fuel. Although some of the other twelve classifications include certain amounts ultimately sold for motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The charts, on page 4, illustrate the growth in the consumption of gasoline and diesel fuel in Canada over the past 26 years.

Gross sales of gasoline in all regions were greater in 1965 than in 1964; net sales, with the exception of Saskatchewan, also showed increases in all provinces and territories.

The increase in net diesel oil sales is due primarily to the continuing increase in the numbers

of diesel-powered units being put into service by motor carriers of freight and by bus operators.

Tables 5 and 7 respectively, show net sales of gasolines and diesel oils by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

July 20, 1966

ROAD TRANSPORT

Catalogue number	Title	Price per copy
	Periodical	
53-001	Motor vehicle Traffic Accidents—quarterly (approx. 34 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, by class of victim, by age group, by province. (A condensed monthly report of motor vehicle traffic accidents is published as a release in the Dominion Bureau of Statistics Daily Bulletin) (\$2 a year)	.50
53-002	Passenger Bus Statistics—Intercity and Rural—Bil. monthly (Class 1 Carriers only) (approx. 4 pp.) Number of companies, passengers carried, revenue vehicle miles run, fuel consumed, by province (\$1 a year)	.10
53-003	Urban Transit—Bil. monthly (Class 1 carriers only) (approx. 4 pp.) Number of companies, passengers carried, vehicle miles run, fuel consumed, and revenue by electric car, trolley coach and motor bus, by province (\$1 a year)	.10
53-004	Motor Transport Traffic: By Commodities—quarterly (approx. 10 pp.) Mileage, ton miles and weight of goods carried by commodity for for-hire and private intercity carriers (\$2 a year)	.50
53-005	Motor Carriers Freight—quarterly (approx. 4 pp.) Numbers of Class 1 and Class 2 companies, operating revenues and expenses and tonnages handled, number of employees, salaries and wages, by province25
	Annual	
53-201	Road and Street Mileage and Expenditure (approx. 22 pp.) Road and street mileages, construction, maintenance and administration expenditures on highways, bridges, ferries and urban streets, by province, federal contributions for Trans-Canada Highway, expenditure of grade crossings50
53-202	International Toll Bridges, Tunnels and Ferries (approx. 12 pp.) Investment, revenues, expenses, traffic, accidents, employees, salaries and wages, with a list of facilities50
53-206	Motor Vehicle Traffic Accidents (approx. 71 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, by class of victim, by age group, by type of vehicle, by class of accident, etc., by province	1.00
53-215	Passenger Bus Statistics (approx. 19 pp.) Number of companies, investment, operating revenues and expenses, employees, salaries and wages, equipment, traffic accidents, fuel consumption, property account, taxes, by province50
53-216	Urban Transit (approx. 14 pp.) Balance sheet, investment, revenues, expenses, passengers carried, vehicle miles run, fuel consumed, by electric car, trolley coach and motor bus, equipment, accidents, employees, salaries and wages by province50
53-217	The Motor Vehicle: Part I—Rates and Regulations (approx. 40 pp.) Size, weight and safety regulations, reciprocal highway agreements, taxes and motor carrier regulations, gasoline tax rate review, passenger cars, trucks and buses annual licence fees by province75
53-218	The Motor Vehicle: Part II—Motive Fuel Sales (approx. 13 pp.) Gross and net sales of gasoline and net sales of diesel oil by province, by year50
53-219	The Motor Vehicle: Part III—Registrations (approx. 18 pp.) Registrations of motor vehicles by major groups, by type of vehicle, drivers' licences, by province, registrations, by place of residence50
53-220	The Motor Vehicle: Part IV—Revenues (approx. 11 pp.) Provincial government revenues from registrations and motive fuel taxes: and unsatisfied judgment fund data, by province50
53-221	Moving and Storage Household Goods (approx. 16 pp.) Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, storage facilities and equipment, fuel consumption and Canadian taxes, by province50
53-222	Motor Carriers—Freight (Common and Contract)—Part I Classes 1 and 2 (approx. 36 pp.) Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, equipment and accidents, by province, by revenue class and by type of operation75
53-223	Motor Carriers—Freight (Common and Contract)—Part II Classes 3 and 4 (approx. 22 pp.) Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, equipment and accidents, by province, by revenue class and by type of operation50
63-212	Warehousing (General Merchandising and Refrigerated Goods) (approx. 10 pp.) Number of companies, property, operating and income accounts, employees compensation, storage facilities, truck equipment, by province50

Motor Transport Traffic

Each of the following series of eight annual reports provides statistics on mileage, fuel consumption, truck capacity, goods carried, ton miles, revenues and number of trucks by type of operation and gross vehicle weight group.

53-207	Motor Transport Traffic: Canada (approx. 30 pp.)50
53-208	Motor Transport Traffic: Atlantic Provinces (approx. 24 pp.)50
53-209	Motor Transport Traffic: Quebec (approx. 13 pp.)50
53-209F	Transport routiers de marchandises: Québec (approx. 13 pp.)50
53-210	Motor Transport Traffic: Ontario (approx. 13 pp.)50
53-211	Motor Transport Traffic: Manitoba (approx. 13 pp.)50
53-212	Motor Transport Traffic: Saskatchewan (approx. 13 pp.)50
53-213	Motor Transport Traffic: Alberta (approx. 13 pp.)50
53-214	Motor Transport Traffic: British Columbia (approx. 13 pp.)50

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution, Dominion Bureau of Statistics, Ottawa, or to the Queen's Printer, Hull, P.Q.

PART II

MOTIVE FUEL SALES

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are subtitled as follows:

	Catalogue No.
Part I—"Rates and Regulations"	53-217
Part II—"Motive Fuel Sales"	53-218
Part III—"Registrations"	53-219
Part IV—"Revenues"	53-220

Part I—"Rates and Regulations" contains information available regarding private passenger and commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and current data on gasoline and other motive fuel taxes, by provinces.

Part II—"Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by provinces and by months.

Part III—"Registrations" includes provincial registrations of the main classes of motor vehicles; a historical table of registrations, by province, and registrations by place of residence.

Part IV—"Revenues" shows provincial government revenues derived from the main classes of motor vehicles and motive fuel taxes. Also provided is a historical table of these revenues and data on the revenues, payments and limitations of the provincial motor vehicle accident claims funds.

Motive Fuel Sales

In this part of the "Motor Vehicle" report, the objective is to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, where-ever possible. The resulting net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline, marked gasoline and liquefied petroleum gases. For the years prior to 1960 aviation fuels are included. Diesel oil sales include both No. 1 and No. 2 grades of diesel oil.

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid,
- (d) Exports.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

- (a) No separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline,
- (b) No data on diesel oil sales in Nova Scotia, prior to 1964, and
- (c) No information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

However, with the co-operation of federal and provincial agencies and the increasing refinement of the reporting form and of the data available, the quality of this report is being steadily improved.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report Refined Petroleum Products (Catalogue No. 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The Refined Petroleum Products report provides total refinery sales figures for all finished petroleum products, while the Motive Fuel Sales report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the Refined Petroleum Products report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo fuel. Although some of the other twelve classifications include certain amounts ultimately sold for motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The charts, on page 4, illustrate the growth in the consumption of gasoline and diesel fuel in Canada over the past 27 years.

Gross sales of gasoline in all regions were greater in 1966 than in 1965; net sales, with the exception of Newfoundland, also showed increases in all provinces and territories.

The increase in net diesel oil sales is due primarily to the continuing increase in the numbers

of diesel-powered units being put into service by motor carriers of freight and by bus operators.

Tables 5 and 7 respectively, show net sales of gasolines and diesel oils by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

October 10, 1967

STATISTICAL TABLES

TABLE 1. Gross Sales of Gasoline, by Province, 1939, 1949, 1959-66
(For motive purposes)

No.	Province	1939	1949	1959
		gallons		
1	Newfoundland ²	30,443,029
2	Prince Edward Island ²	4,128,907	8,240,105	17,854,271

ROAD TRANSPORT

Catalogue number	Title	Price per copy
Periodical		
53-001	Motor Vehicle Traffic Accidents – quarterly (approx. 34 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, by class of victim, by age group, by province. (A condensed monthly report of motor vehicle traffic accidents is published as a release in the Dominion Bureau of Statistics Daily Bulletin) (\$2 a year)	\$.50
53-002	Passenger Bus Statistics – Intercity and Rural – Bil. monthly (Class 1 Carriers only) (approx. 4 pp.) Number of companies, passengers carried, revenue vehicle miles run, fuel consumed, by province (\$1 a year)	.10
53-003	Urban Transit – Bil. monthly (Class 1 carriers only) (approx. 4 pp.) Number of companies, passengers carried, vehicle miles run, fuel consumed, and revenue by electric car, trolley coach and motor bus, by province (\$1 a year)	.10
53-005	Motor Carriers Freight – Bil. quarterly (approx. 4 pp.) Number of Class 1 and Class 2 companies, operating revenues and expenses, and tonnages handled, number of employees, salaries and wages, by province (\$1 a year)	.25
Annual		
53-201	Road and Street Mileage and Expenditure (approx. 22 pp.) Road and street mileages, construction, maintenance and administration expenditures on highways, bridges, ferries and urban streets, by province, federal contributions for Trans-Canada Highway, expenditure of grade crossings50
53-202	International Toll Bridges, Tunnels and Ferries (approx. 12 pp.) Investment, revenues, expenses, traffic, accidents, employees, salaries and wages, with a list of facilities50
53-206	Motor Vehicle Traffic Accidents (approx. 71 pp.) Number of accidents, persons killed and injured, property damage, time, place, road conditions, by class of victim, by age group, by type of vehicle, by class of accident, etc., by province	1.00
53-215	Passenger Bus Statistics (approx. 19 pp.) Number of companies, investment, operating revenues and expenses, employees, salaries and wages, equipment, traffic accidents, fuel consumption, property account, taxes, by province50
53-216	Urban Transit (approx. 14 pp.) Balance sheet, revenues, expenses, passengers carried, vehicle miles run, fuel consumed, by electric car, trolley coach and motor bus, equipment, accidents, employees, salaries and wages, by province50
53-217	The Motor Vehicle: Part I – Rates and Regulations (approx. 40 pp.) Size, weight and safety regulations, reciprocal highway agreements, taxes and motor carrier regulations, gasoline tax rate review, passenger cars, trucks and buses annual licence fees, by province75
53-218	The Motor Vehicle: Part II – Motive Fuel Sales (approx. 13 pp.) Gross and net sales of gasoline and net sales of diesel oil, by province, by year50
53-219	The Motor Vehicle: Part III – Registrations (approx. 18 pp.) Registrations of motor vehicles by major groups, by type of vehicle, drivers' licences, by province, and registrations by place of residence50
53-220	The Motor Vehicle: Part IV – Revenues (approx. 11 pp.) Provincial government revenues from registrations and motive fuel taxes: and unsatisfied judgment fund data, by province50
53-221	Moving and Storage Household Goods (approx. 16 pp.) Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, storage facilities and equipment, fuel consumption and Canadian taxes, by province50
53-222	Motor Carriers – Freight (Common and Contract) – Part I Classes 1 and 2 (approx. 36 pp.) Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, equipment and accidents, by province, by revenue class and by type of operation75
53-223	Motor Carriers – Freight (Common and Contract) – Part II Classes 3 and 4 (approx. 22 pp.) Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, equipment and accidents, by province, by revenue class and by type of operation50
63-212	Warehousing (General Merchandising and Refrigerated Goods) (approx. 10 pp.) Number of companies, property, operating and income accounts, employees and their compensation, storage facilities, truck equipment, by province50

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution, Dominion Bureau of Statistics, Ottawa, or to the Queen's Printer, Hull, P.Q.

GROSS SALES OF GASOLINE IN CANADA SHOWING TAXABLE AMOUNTS PURCHASED

1939 — 1967

NET SALES OF DIESEL OIL IN CANADA

1939 — 1967

THE MOTOR VEHICLE

1967

PART II

MOTIVE FUEL SALES

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are subtitled as follows:

	Catalogue No.
Part I—"Rates and Regulations"	53-217
Part II—"Motive Fuel Sales"	53-218
Part III—"Registrations"	53-219
Part IV—"Revenues"	53-220

Part I—"Rates and Regulations" contains information available regarding private passenger and commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and current data on gasoline and other motive fuel taxes, by provinces.

Part II—"Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by provinces and by months.

Part III—"Registrations" includes provincial registrations of the main classes of motor vehicles; a historical table of registrations, by province, and registrations by place of residence.

Part IV—"Revenues" shows provincial government revenues derived from the main classes of motor vehicles and motive fuel taxes. Also provided is a historical table of these revenues and data on the revenues, payments and limitations of the provincial motor vehicle accident claims funds.

Motive Fuel Sales

In this part of the "Motor Vehicle" report, the objective is to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, wherever possible. The resulting net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline, marked gasoline and liquefied petroleum gases. For the years prior to 1960 aviation fuels are included. Diesel oil sales include both No. 1 and No. 2 grades of diesel oil.

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid,
- (d) Exports.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

(a) No separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline,

(b) No data on diesel oil sales in Nova Scotia, prior to 1964, and

(c) No information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

However, with the co-operation of federal and provincial agencies and the increasing refinement of the reporting form and of the data available, the quality of this report is being steadily improved.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report Refined Petroleum Products (Catalogue No. 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The Refined Petroleum Products report provides total refinery sales figures for all finished petroleum products, while the Motive Fuel Sales report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the Refined Petroleum Products report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo fuel. Although some of the other twelve classifications include certain amounts ultimately sold for motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The charts, on page 4, illustrate the growth in the consumption of gasoline and diesel fuel in Canada over the past 28 years.

Gross sales of gasoline in all regions, except Saskatchewan, were greater in 1967 than in 1966; net sales, with the exception of Newfoundland, Prince Edward Island and Manitoba, also showed increases in all provinces and territories. Newfoundland and Quebec were the only reporting authorities to show a decrease in net diesel oil in 1967 as compared with 1966.

The increase in net diesel oil sales is due primarily to the continuing increase in the numbers of diesel-powered units being put into service by motor carriers of freight and by bus operators.

Tables 5 and 7 respectively, show net sales of gasolines and diesel oils by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

May 9, 1968

STATISTICAL TABLES

TABLE 1. Gross Sales of Gasoline, by Province, 1939, 1949, 1959, 1961-67
(For motive purposes)

No.	Province	1939	1949	1959
		gallons		
1	Newfoundland ²			30,443,029
2	Prince Edward Island ²	4,128,907	8,240,105	17,854,271
3	Nova Scotia ²	31,621,971	57,443,469	104,250,854
4	New Brunswick ³	23,192,413	56,685,862	101,261,096
5	Quebec	138,925,246	304,139,386	755,247,641
6	Ontario ³	345,105,726	623,684,828	1,340,853,693
7	Manitoba	41,455,558	104,023,413	225,912,673
8	Saskatchewan	87,877,403	168,266,743	283,963,876
9	Alberta ⁴	75,535,323	218,935,855	474,001,753
10	British Columbia	59,823,751	142,297,406	345,370,730
11	Yukon and Northwest Territories	11,518,629
12	Totals	807,666,298	1,683,717,067	3,690,678,245

¹ Excludes aviation and aviation turbo fuels.

² Gross sales of motor and tractor grades only until January 1, 1956 in Newfoundland and Nova Scotia and July 1, 1961 in Prince Edward Island when sales of marked gasoline were included.

TABLE 2. Net Sales^{1,2} of Gasoline, by Province, 1939, 1949, 1959, 1961-67
(Consumed on public roads and highways)

No.	Province	1939	1949	1959
		gallons		
1	Newfoundland ⁴		5,591,000	28,119,711
2	Prince Edward Island	3,202,424	6,177,566	14,288,039
3	Nova Scotia	26,620,062	49,282,291	89,979,118

ROAD TRANSPORT

**Catalogue
number**

Title

Periodical

- 53-001 **Motor Vehicle Traffic Accidents – quarterly**
Number of accidents, persons killed and injured, property damage, time, place, road conditions, by class of victim, by age group, by province. (A condensed monthly report of motor vehicle traffic accidents is published as a release in the Dominion Bureau of Statistics Daily Bulletin).
- 53-002 **Passenger Bus Statistics – Intercity and Rural – Bil. monthly (Class 1 Carriers only)**
Number of companies, passengers carried, revenue vehicle miles run, fuel consumed, by province.
- 53-003 **Urban Transit – Bil. monthly (Class 1 carriers only)**
Number of companies, passengers carried, vehicle miles run, fuel consumed, and revenue by electric car, trolley coach and motor bus, by province.
- 53-005 **Motor Carriers Freight – Bil. quarterly**
Number of Class 1 and Class 2 companies, operating revenues and expenses, and tonnages handled, number of employees, salaries and wages, by province.

Annual

- 53-201 **Road and Street Mileage and Expenditure**
Road and street mileages, construction, maintenance and administration expenditures on highways, bridges, ferries and urban streets, by province, federal contributions for Trans-Canada Highway, expenditure of grade crossings.
- 53-202 **International Toll Bridges, Tunnels and Ferries**
Investment, revenues, expenses, traffic, accidents, employees, salaries and wages, with a list of facilities.
- 53-206 **Motor Vehicle Traffic Accidents**
Number of accidents, persons killed and injured, property damage, time, place, road conditions, by class of victim, by age group, by type of vehicle, by class of accident, etc., by province.
- 53-215 **Passenger Bus Statistics**
Number of companies, investment, operating revenues and expenses, employees, salaries and wages, equipment, traffic accidents, fuel consumption, property account, taxes, by province.
- 53-216 **Urban Transit**
Balance sheet, revenues, expenses, passengers carried, vehicle miles run, fuel consumed, by electric car, trolley coach and motor bus, equipment, accidents, employees, salaries and wages, by province.
- 53-217 **The Motor Vehicle: Part I – Rates and Regulations**
Size, weight and safety regulations, reciprocal highway agreements, taxes and motor carrier regulations, gasoline tax rate review, passenger cars, trucks and buses annual licence fees, by province.
- 53-218 **The Motor Vehicle: Part II – Motive Fuel Sales**
Gross and net sales of gasoline and net sales of diesel oil, by province, by year.
- 53-219 **The Motor Vehicle: Part III – Registrations**
Registrations of motor vehicles by major groups, by type of vehicle, drivers' licenses, by province, and registrations by place of residence.
- 53-220 **The Motor Vehicle: Part IV – Revenues**
Provincial government revenues from registrations and motive fuel taxes: and unsatisfied judgment fund data, by province.
- 53-221 **Moving and Storage Household Goods**
Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, storage facilities and equipment, fuel consumption and Canadian taxes, by province.
- 53-222 **Motor Carriers – Freight (Common and Contract) – Part I Classes 1 and 2**
Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, equipment and accidents, by province, by revenue class and by type of operation.
- 53-223 **Motor Carriers – Freight (Common and Contract) – Part II Classes 3 and 4**
Number of companies, balance sheet, operating revenues and expenses, employees, salaries and wages, equipment and accidents, by province, by revenue class and by type of operation.
- 63-212 **Warehousing (General Merchandising and Refrigerated Goods)**
Number of companies, property, operating and income accounts, employees, and their compensation, storage facilities, truck equipment, by province.

In addition to the selected publications listed above, the Dominion Bureau of Statistics publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from the Dominion Bureau of Statistics, Ottawa 3.

GROSS SALES OF GASOLINE IN CANADA SHOWING TAXABLE AMOUNTS PURCHASED

1939—1968

NET SALES OF DIESEL OIL IN CANADA

1939—1968

THE MOTOR VEHICLE

1968

PART II

MOTIVE FUEL SALES

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are subtitled as follows:

	Catalogue No.
Part I—"Rates and Regulations"	53-217
Part II—"Motive Fuel Sales"	53-218
Part III—"Registrations"	53-219
Part IV—"Revenues"	53-220

Part I—"Rates and Regulations" contains information available regarding private passenger and commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and current data on gasoline and other motive fuel taxes, by provinces.

Part II—"Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by provinces and by months.

Part III—"Registrations" includes provincial registrations of the main classes of motor vehicles; a historical table of registrations, by province, and registrations by place of residence.

Part IV—"Revenues" shows provincial government revenues derived from the main classes of motor vehicles and motive fuel taxes. Also provided is a historical table of these revenues and data on the revenues, payments and limitations of the provincial motor vehicle accident claims funds.

Motive Fuel Sales

In this part of the "Motor Vehicle" report, the objective is to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, wherever possible. The resulting net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline, marked gasoline and liquefied petroleum gases. For the years prior to 1960 aviation fuels are included. Diesel oil sales include both No. 1 and No. 2 grades of diesel oil.

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

- (a) No separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline,
- (b) No data on diesel oil sales in Nova Scotia, prior to 1964, and
- (c) No information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

However, with the co-operation of federal and provincial agencies and the increasing refinement of the reporting form and of the data available, the quality of this report is being steadily improved.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report Refined Petroleum Products (Catalogue No. 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The Refined Petroleum Products report provides total refinery sales figures for all finished petroleum products, while the Motive Fuel Sales report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the Refined Petroleum Products report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo fuel. Although some of the other twelve classifications include certain amounts ultimately sold for motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The charts, on page 4, illustrate the growth in the consumption of gasoline and diesel fuel in Canada over the past 29 years.

Gross sales of gasoline in all regions, except Saskatchewan, were greater in 1968 than in 1967; net sales of gasoline showed increases in all provinces and territories. Prince Edward Island and New Brunswick were the only reporting authorities to show a decrease in the net diesel oil in 1968 as compared with 1967.

The increase in net diesel oil sales is due primarily to the continuing increase in the numbers of diesel-powered units being put into service by motor carriers of freight and by bus operators.

Tables 5 and 7 respectively, show net sales of gasolines and diesel oils, by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

August 18, 1969

STATISTICAL TABLES

TABLE 1. Gross Sales of Gasoline, by Province, 1939, 1949, 1959, 1962-68
(For motive purposes)

No.	Province	1939	1949	1959
		gallons		
1	Newfoundland ²			30,443,029
2	Prince Edward Island ²	4,128,907	8,240,105	17,854,271
3	Nova Scotia ²	31,621,971	57,443,469	104,250,854

PART II

MOTIVE FUEL SALES

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are subtitled as follows:

	Catalogue No.
Part I—"Rates and Regulations"	53-217
Part II—"Motive Fuel Sales"	53-218
Part III—"Registrations"	53-219
Part IV—"Revenues"	53-220

Part I—"Rates and Regulations" contains information available regarding private passenger and commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and current data on gasoline and other motive fuel taxes, by provinces.

Part II—"Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by provinces and by months.

Part III—"Registrations" includes provincial registrations of the main classes of motor vehicles; a historical table of registrations, by province, and registrations by place of residence.

Part IV—"Revenues" shows provincial government revenues derived from the main classes of motor vehicles and motive fuel taxes. Also provided is a historical table of these revenues and data on the revenues, payments and limitations of the provincial motor vehicle accident claims funds.

Motive Fuel Sales

In this part of the "Motor Vehicle" report, the objective is to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, wherever possible. The resulting net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline, marked gasoline and liquefied petroleum gases. For the years prior to 1960 aviation fuels are included. Diesel oil sales include both No. 1 and No. 2 grades of diesel oil.

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

- (a) No separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline,
- (b) No data on diesel oil sales in Nova Scotia, prior to 1964, and
- (c) No information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

However, with the co-operation of federal and provincial agencies and the increasing refinement of the reporting form and of the data available, the quality of this report is being steadily improved.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report Refined Petroleum Products (Catalogue No. 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The Refined Petroleum Products report provides total refinery sales figures for all finished petroleum products, while the Motive Fuel Sales report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the Refined Petroleum Products report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo fuel. Although some of the other twelve classifications include certain amounts ultimately sold for motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The charts, on page 4, illustrate the growth in the consumption of gasoline and diesel fuel in Canada over the past 30 years.

Gross sales of gasoline in all regions, except Saskatchewan, were greater in 1969 than in 1968; net sales of gasoline showed a decrease in Saskatchewan over the previous year. Prince Edward Island was the only reporting authority to show a decrease in the net diesel oil in 1969 as compared with 1968.

An unusual situation exists in Newfoundland which causes the net sales of gasoline to be understated and the net sales of diesel fuel to be overstated. The reason for this is that all motive fuel for tax purposes is described as "gasoline" in the Newfoundland gasoline Tax Act. The province reports gross sales of both gasoline and diesel. However, when refunds on gasoline tax are made, the number of gallons of fuel related to the refund

is deducted from the gross sales of gasoline only rather than from both fuels according to the proportion on which refunds of tax were made. The addition of the Newfoundland gross sales of diesel fuel to the net sales of gasoline as shown on the tables in the publication gives the actual approximation of motive fuel sales for consumption on public roads and streets. The proportion of net gasoline sales to net diesel sales is more like 13.6 gallons to 1, or approximately 67.5 million gallons to 4.9 million gallons. This problem has not been solved as yet. When the facts are better known the historical data on fuel sales in Newfoundland will be revised.

Tables 5 and 7 respectively, show net sales of gasoline and diesel oils, by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

September 15, 1970

MOTIVE FUEL SALES

VÉHICULES A MOTEUR

PARTIE II

VENTES DES CARBURANTS

1970

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are subtitled as follows:

	Catalogue No.
Part I—"Rates and Regulations"	53-217
Part II—"Motive Fuel Sales"	53-218
Part III—"Registrations"	53-219
Part IV—"Revenues"	53-220

Part I—"Rates and Regulations" contains information available regarding private passenger and commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and current data on gasoline and other motive fuel taxes, by provinces.

Part II—"Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by provinces and by months.

Part III—"Registrations" includes provincial registrations of the main classes of motor vehicles; a historical table of registrations, by province, and registrations by place of residence.

Part IV—"Revenues" shows provincial government revenues derived from the main classes of motor vehicles and motive fuel taxes. Also provided is a historical table of these revenues and data on the revenues, payments and limitations of the provincial motor vehicle accident claims funds.

Motive Fuel Sales

In this part of the "Motor Vehicle" report, the objective is to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, wherever possible. The result-

La présente publication fait partie d'un groupe de quatre volumes dont l'ensemble porte le titre véhicules à moteur; ce sont:

	N° de catalogue
Volume I—"Rates and Regulations"	53-217
Volume II—"Ventes de carburants"....	53-218
Volume III—"Registrations".....	53-219
Volume IV—"Revenues"	53-220

Le Volume I fournit des renseignements sur les règlements relatifs aux voitures de tourisme et aux véhicules utilitaires (impôts, prix des permis, accords routiers, taille, poids, sécurité, données actuelles sur les taxes imposées sur l'essence et les autres combustibles, par province).

Le Volume II donne les ventes brutes et nettes d'essence et les ventes nettes de carburant diesel, par province et pour chaque mois.

Le Volume III donne des renseignements sur l'immatriculation des principaux groupes de véhicules à moteur, un tableau chronologique des immatriculations, par province, et un tableau des immatriculations, par lieu de résidence.

Le Volume IV présente le montant des revenus que les provinces tirent des impôts sur les principaux groupes de véhicules à moteur et sur les carburants. Ce volume contient en outre un tableau chronologique de ces revenus et des données sur les cotisations et les fonds d'indemnisation des victimes d'accident d'automobiles.

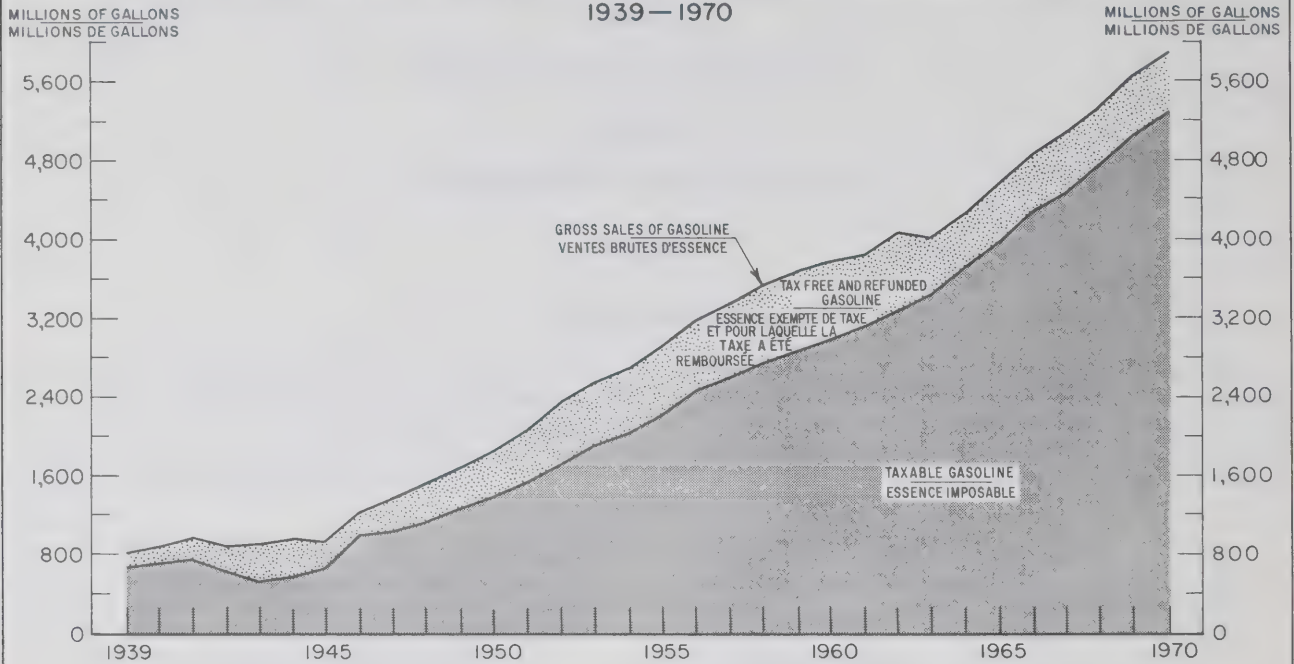

Ventes de carburants

Le but du présent volume du rapport "Véhicules à moteur" est d'évaluer en gros la quantité totale de carburant acheté au Canada pour être consommé par des véhicules à moteur sur les voies carrossables. Comme il est impossible d'obtenir des renseignements précis qui soient conformes à cette définition, il a fallu, quand c'était possible, soustraire de la quantité totale la quantité de carburant utilisé à d'autres fins. Les données sur les ventes nettes qu'on obtient

THE MOTOR VEHICLE

GROSS SALES OF GASOLINE IN CANADA SHOWING TAXABLE AMOUNTS PURCHASED 1939—1970

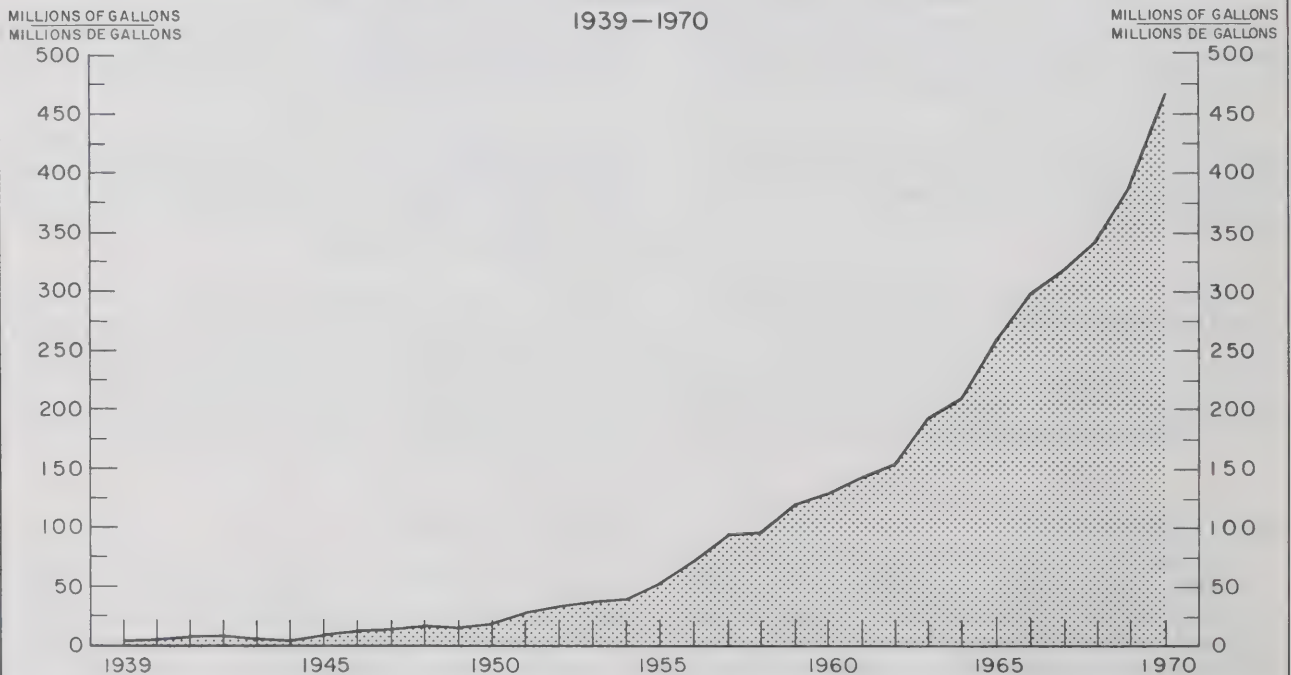

VENTES BRUTES D'ESSENCE AU CANADA QUANTITÉS D'ESSENCE IMPOSABLE ACHETÉES 1939—1970

1939—1970

VENTES NETTES DE CARBURANT DIESEL AU CANADA 1939—1970

ing net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline, marked gasoline and liquefied petroleum gases. For the years prior to 1960 aviation fuels are included. Diesel oil sales include both No. 1 and No. 2 grades of diesel oil.

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

- (a) No separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline,
- (b) No data on diesel oil sales in Nova Scotia, prior to 1964, and
- (c) No information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

However, with the co-operation of federal and provincial agencies and the increasing refinement of the reporting form and of the data available, the quality of this report is being steadily improved.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report *Refined Petroleum Products* (Catalogue No. 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The *Refined Petroleum Products* report provides total refinery sales figures for all finished petroleum products, while the *Motive Fuel Sales* report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the *Refined Petroleum Products* report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in

de la sorte correspondent sensiblement à la quantité réelle de carburant consommé sur les voies routières.

Ventes brutes et nettes

Les chiffres sur la vente de l'essence comprennent l'essence destinée aux véhicules à moteur en général et l'essence pour tracteur, l'essence marquée et les gaz de pétrole liquéfiés. Avant 1960, ces chiffres comprenaient l'essence d'aviation. Les ventes de carburant diesel comprennent les qualités n° 1 et n° 2.

On obtient les données sur le montant des ventes nettes en soustrayant des ventes brutes:

- a) les ventes exemptes d'impôt au gouvernement fédéral,
- b) les ventes exemptes d'impôt aux autres consommateurs et
- c) les ventes faisant l'objet d'un remboursement.

Les ventes nettes sont donc celles sur lesquelles on a payé un ou plusieurs impôts.

La collecte de données précises a soulevé plusieurs problèmes; en voici quelques uns:

- a) en Ontario, on n'a pas fait de distinction entre les ventes d'essence d'aviation et les autres types d'essence avant le 1er avril 1963;
- b) en Nouvelle-Écosse, on n'a pas recueilli de données sur le carburant diesel avant 1964 et
- c) il n'existe pas de données sur les achats de carburant par le gouvernement fédéral.

Toutefois, grâce à la collaboration des agences fédérales et provinciales et à la plus grande précision des questionnaires et des données disponibles, la qualité de ce bulletin s'accroît d'année en année.

Autres données comparables

Malgré la ressemblance apparente qu'il y a entre le montant des ventes nettes du bulletin préparé par la Division de l'industrie et intitulé *Refined Petroleum Products* (n° de catalogue 45-204) et celui des ventes brutes du présent bulletin, la différence qui existe au niveau des définitions rend difficile toute comparaison.

Le bulletin *Refined Petroleum Products* fournit en effet le montant des ventes brutes de tous les produits dérivés du pétrole raffiné tandis que le présent bulletin indique le montant des ventes brutes d'essence destinée aux véhicules à moteur et le montant des ventes nettes de carburant consommé par des véhicules à moteur sur les routes.

Dans le bulletin *Refined Petroleum Products*, les ventes brutes de produits dérivés du pétrole raffiné sont classées en quinze groupes qui englobent presque tous les produits de la distillation du pétrole. La dénomination de ces groupes indique dans quelques

some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo fuel. Although some of the other twelve classifications include certain amounts ultimately sold for motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The charts, on page 6, illustrate the growth in the consumption of gasoline and diesel fuel in Canada over the past 31 years.

Gross sales of gasoline in all regions, except Saskatchewan, were greater in 1970 than in 1969; net sales of gasoline showed a decrease in Saskatchewan over the previous year. Newfoundland and Prince Edward Island showed a decrease in net diesel oil in 1970 as compared with 1969.

An unusual situation exists in Newfoundland which causes the net sales of gasoline to be understated and the net sales of diesel fuel to be overstated. The reason for this is that all motive fuel for tax purposes is described as "gasoline" in the Newfoundland gasoline Tax Act. The province reports gross sales of both gasoline and diesel. However, when refunds on gasoline tax are made, the number of gallons of fuel related to the refund is deducted from the gross sales of gasoline only rather than from both fuels according to the proportion on which refunds of tax were made. The addition of the Newfoundland gross sales of diesel fuel to the net sales of gasoline as shown on the tables in the publication gives the actual approximation of motive fuel sales for consumption on public roads and streets. The proportion of net gasoline sales to net diesel sales is more like 13.6 gallons to 1, or approximately 67.5 million gallons to 4.9 million gallons. This problem has not been solved as yet. When the facts are better known the historical data on fuel sales in Newfoundland will be revised.

Tables 5 and 7 respectively, show net sales of gasoline and diesel oils, by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

cas l'usage que l'on fait des produits (essence d'aviation et essence pour les véhicules à moteur); toutefois, bien que parmi les douze autres groupes il en soit qui renferment des données sur les ventes de carburants, il est impossible d'isoler ces données et d'obtenir des résultats aussi précis que ceux qui sont présentés dans la présente publication.

Résumé

Les graphiques de la page 6 illustrent l'accroissement de la consommation d'essence et de carburant diesel au Canada au cours des 31 dernières années.

En 1970, les ventes brutes d'essence ont été supérieures à celles de 1969 dans toutes les régions sauf en Saskatchewan où les ventes nettes d'essence ont été inférieures à celles de l'année précédente. A Terre-Neuve et dans l'Île-du-Prince-Édouard, les ventes nettes de carburant diesel ont été moins considérables en 1970 qu'en 1969.

Une situation exceptionnelle existe à Terre-Neuve où les ventes nettes d'essence tendent à être sous-estimées et celles de carburant diesel, à être gonflées parce que tous les carburants imposables sont désignés "essence" aux fins de la loi terre-neuvienne sur l'imposition de l'essence. Cette province déclare les ventes brutes d'essence et de carburant diesel mais la quantité de ces deux carburants pour laquelle la taxe a été remboursée est déduite entièrement des ventes d'essence, au lieu d'être répartie entre les deux suivant le nombre de gallons de chacun pour lesquels la taxe a été remboursée. En additionnant les ventes brutes de carburant diesel et les ventes nettes d'essence à Terre-Neuve comme on l'a fait pour les tableaux du présent bulletin, on en arrive à une estimation assez juste des ventes de carburant consommé sur les voies publiques. Le rapport entre les ventes nettes d'essence et les ventes nettes de carburant diesel se rapproche de 13.6 à 1, c'est-à-dire environ 67.5 millions de gallons d'essence pour 4.9 millions de gallons de carburant diesel. Ce problème n'a pas encore été résolu. Lorsque la situation sera mieux connue, les données chronologiques sur les ventes de carburant à Terre-Neuve seront rectifiées.

Les Tableaux 5 et 7 présentent respectivement les ventes nettes d'essence et celles de carburant diesel, par mois. Il convient de signaler que le chiffre des ventes nettes mensuelles peut être légèrement faussé parce qu'on le calcule en soustrayant des ventes de carburants taxés pour un mois en particulier celles de carburants exempts de taxe pour le même mois.

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- † revised figures.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications du Bureau fédéral de la statistique:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.

INTRODUCTION

The present publication represents one volume of a set of four which comprise "The Motor Vehicle" report. These volumes are subtitled as follows:

	Catalogue
Part I—"Rates and Regulations"	53-217
Part II—"Motive Fuel Sales"	53-218
Part III—"Registrations"	53-219
Part IV—"Revenues"	53-220

Part I—"Rates and Regulations" contains information available regarding private passenger and commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and current data on gasoline and other motive fuel taxes, by provinces.

Part II—"Motive Fuel Sales" contains gross and net sales of gasoline and net sales of diesel oil, by provinces and by months.

Part III—"Registrations" includes provincial registrations of the main classes of motor vehicles; a historical table of registrations, by province, and registrations by place of residence.

Part IV—"Revenues" shows provincial government revenues derived from the main classes of motor vehicles and motive fuel taxes. Also provided is a historical table of these revenues and data on the revenues, payments and limitations of the provincial motor vehicle accident claims funds.

Motive Fuel Sales

In this part of the "Motor Vehicle" report, the objective is to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, wherever possible. The resulting net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline, marked gasoline and liquefied petroleum gases. For the years prior to 1960 aviation fuels are included. Diesel oil sales include both No. 1 and No. 2 grades of diesel oil.

La présente publication fait partie d'un groupe de quatre volumes dont l'ensemble porte le titre véhicules à moteur; ce sont:

	Catalogue
Volume I—"Charges fiscales et réglementation."	53-217
Volume II—"Ventes de carburants"....	53-218
Volume III—"Registrations"	53-219
Volume IV—"Revenues"	53-220

Le Volume I fournit des renseignements sur les règlements relatifs aux voitures de tourisme et aux véhicules utilitaires (impôts, prix des permis, accords routiers, taille, poids, sécurité, données actuelles sur les taxes imposées sur l'essence et les autres combustibles, par province).

Le Volume II donne les ventes brutes et nettes d'essence et les ventes nettes de carburant diesel, par province et pour chaque mois.

Le Volume III donne des renseignements sur l'immatriculation des principaux groupes de véhicules à moteur, un tableau chronologique des immatriculations, par province, et un tableau des immatriculations, par lieu de résidence.

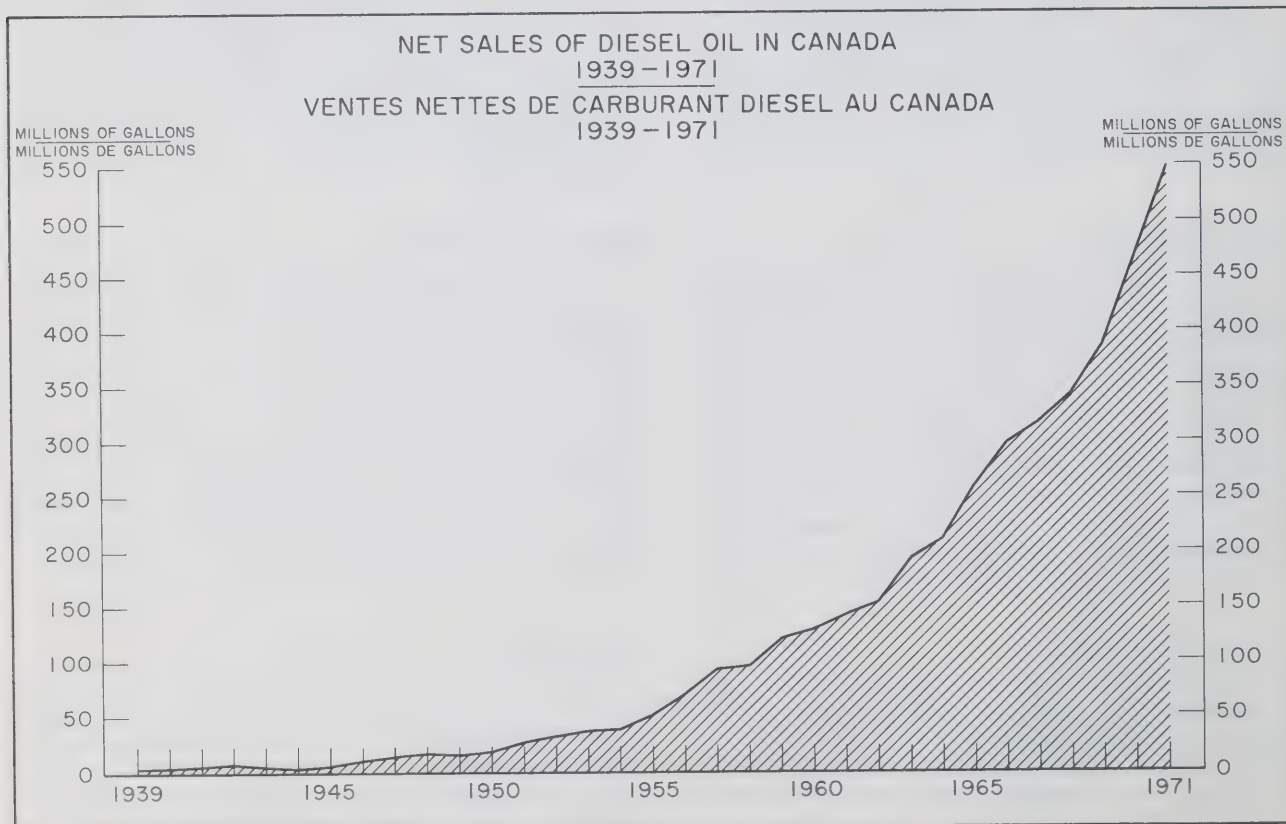

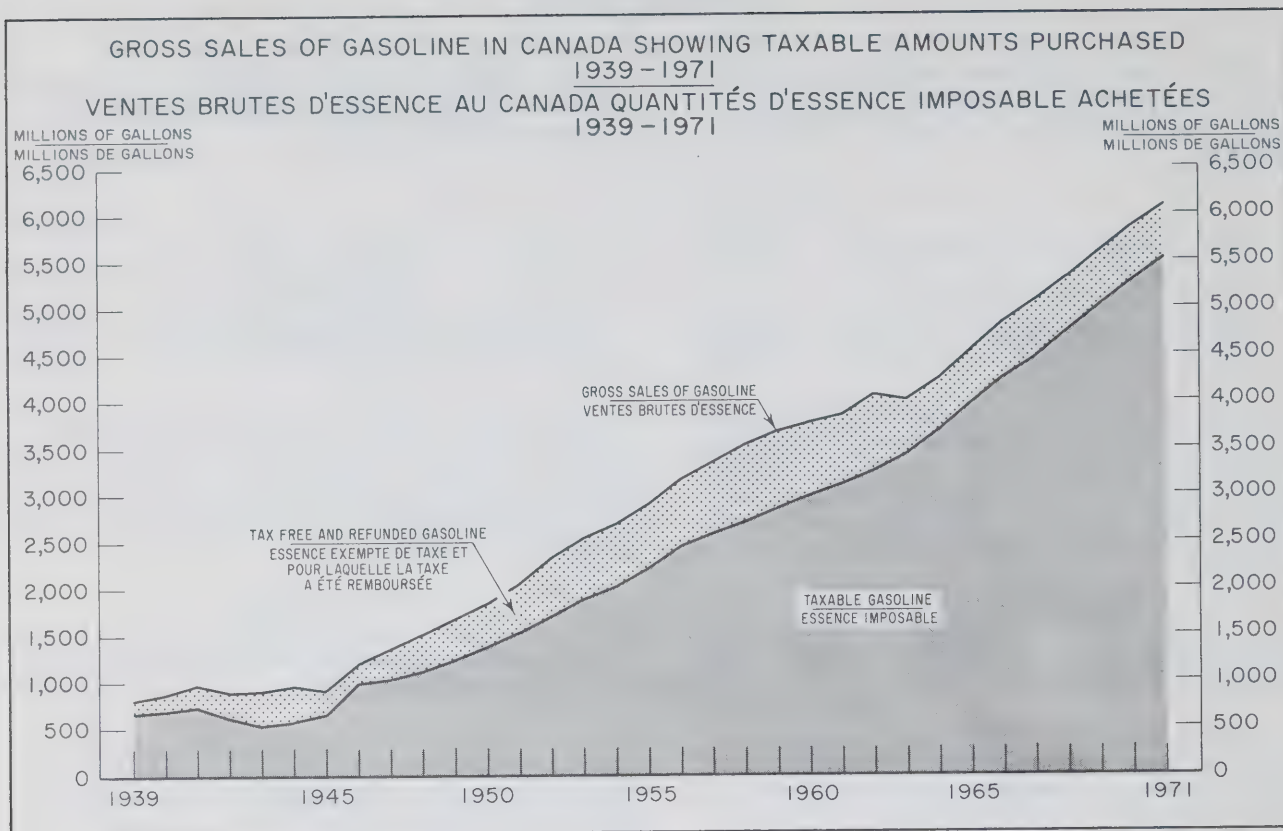

Le Volume IV présente le montant des revenus que les provinces tirent des impôts sur les principaux groupes de véhicules à moteur et sur les carburants. Ce volume contient en outre un tableau chronologique de ces revenus et des données sur les cotisations et les fonds d'indemnisation des victimes d'accident d'automobiles.

Ventes de carburants

Le but du présent volume du rapport "Véhicules à moteur" est d'évaluer en gros la quantité totale de carburant acheté au Canada pour être consommé par des véhicules à moteur sur les voies carrossables. Comme il est impossible d'obtenir des renseignements précis qui soient conformes à cette définition, il a fallu, quand c'était possible, soustraire de la quantité totale la quantité de carburant utilisé à d'autres fins. Les données sur les ventes nettes qu'on obtient de la sorte correspondent sensiblement à la quantité réelle de carburant consommé sur les voies routières.

Ventes brutes et nettes

Les chiffres sur la vente de l'essence comprennent l'essence destinée aux véhicules à moteur en général et l'essence pour tracteur, l'essence marquée et les gaz de pétrole liquéfiés. Avant 1960, ces chiffres comprenaient l'essence d'aviation. Les ventes de carburant diesel comprennent les qualités n° 1 et n° 2.

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

- (a) No separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline,
- (b) No data on diesel oil sales in Nova Scotia, prior to 1964, and
- (c) No information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

However, with the co-operation of federal and provincial agencies and the increasing refinement of the reporting form and of the data available, the quality of this report is being steadily improved.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report *Refined Petroleum Products* (Catalogue No. 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The *Refined Petroleum Products* report provides total refinery sales figures for all finished petroleum products, while the Motive Fuel Sales report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the *Refined Petroleum Products* report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo fuel. Although some of the other twelve classifications include certain amounts ultimately sold for motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The charts, on page 6, illustrate the growth in the consumption of gasoline and diesel fuel in Canada over the past 31 years.

On obtient les données sur le montant des ventes nettes en soustrayant des ventes brutes:

- a) les ventes exemptes d'impôt au gouvernement fédéral,
- b) les ventes exemptes d'impôt aux autres consommateurs et
- c) les ventes faisant l'objet d'un remboursement.

Les ventes nettes sont donc celles sur lesquelles on a payé un ou plusieurs impôts.

La collecte de données précises a soulevé plusieurs problèmes; en voici quelques uns:

- a) en Ontario, on n'a pas fait de distinction entre les ventes d'essence d'aviation et les autres types d'essence avant le 1er avril 1963;
- b) en Nouvelle-Écosse, on n'a pas recueilli de données sur le carburant diesel avant 1964 et
- c) il n'existe pas de données sur les achats de carburant par le gouvernement fédéral.

Toutefois, grâce à la collaboration des agences fédérales et provinciales et à la plus grande précision des questionnaires et des données disponibles, la qualité de ce bulletin s'accroît d'année en année.

Autres données comparables

Malgré la ressemblance apparente qu'il y a entre le montant des ventes nettes du bulletin préparé par la Division de l'industrie et intitulé *Refined Petroleum Products* (n° de catalogue 45-204) et celui des ventes brutes du présent bulletin, la différence qui existe au niveau des définitions rend difficile toute comparaison.

Le bulletin *Refined Petroleum Products* fournit en effet le montant des ventes brutes de tous les produits dérivés du pétrole raffiné tandis que le présent bulletin indique le montant des ventes brutes d'essence destinée aux véhicules à moteur et le montant des ventes nettes de carburant consommé par des véhicules à moteur sur les routes.

Dans le bulletin *Refined Petroleum Products*, les ventes brutes de produits dérivés du pétrole raffiné sont classées en quinze groupes qui englobent presque tous les produits de la distillation du pétrole. La dénomination de ces groupes indique dans quelques cas l'usage que l'on fait des produits (essence d'aviation et essence pour les véhicules à moteur); toutefois, bien que parmi les douze autres groupes il en soit qui renferment des données sur les ventes de carburants, il est impossible d'isoler ces données et d'obtenir des résultats aussi précis que ceux qui sont présentés dans la présente publication.

Résumé

Les graphiques de la page 6 illustrent l'accroissement de la consommation d'essence et de carburant diesel au Canada au cours des 31 dernières années.

Net sales of gasoline and of diesel oil were greater in 1971 than in 1970 in all regions except the Yukon and Northwest Territories. Gross sales of gasoline showed an increase in all regions.

An unusual situation exists in Newfoundland which causes the net sales of gasoline to be understated and the net sales of diesel fuel to be overstated. The reason for this is that all motive fuel for tax purposes is described as "gasoline" in the Newfoundland gasoline Tax Act. The province reports gross sales of both gasoline and diesel. However, when refunds on gasoline tax are made, the number of gallons of fuel related to the refund is deducted from the gross sales of gasoline only rather than from both fuels according to the proportion on which refunds of tax were made. The addition of the Newfoundland gross sales of diesel fuel to the net sales of gasoline as shown on the tables in the publication gives the actual approximation of motive fuel sales for consumption on public roads and streets. The proportion of net gasoline sales to net diesel sales is more like 13.6 gallons to 1, or approximately 67.5 million gallons to 4.9 million gallons. This problem has not been solved as yet. When the facts are better known the historical data on fuel sales in Newfoundland will be revised.

Tables 5 and 7 respectively, show net sales of gasoline and diesel oils, by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

Les ventes nettes d'essence et de carburant diesel en 1971 ont été supérieures à celles de 1970 dans toutes les régions, sauf au Yukon et dans les Territoires du Nord-Ouest. Les ventes brutes d'essence ont progressé dans toutes les régions.

Une situation exceptionnelle existe à Terre-Neuve où les ventes nettes d'essence tendent à être sous-estimées et celles de carburant diesel, à être gonflées parce que tous les carburants imposables sont désignés "essence" aux fins de la loi terre-neuvienne sur l'imposition de l'essence. Cette province déclare les ventes brutes d'essence et de carburant diesel mais la quantité de ces deux carburants pour laquelle la taxe a été remboursée est déduite entièrement des ventes d'essence, au lieu d'être répartie entre les deux suivant le nombre de gallons de chacun pour lesquels la taxe a été remboursée. En additionnant les ventes brutes de carburant diesel et les ventes nettes d'essence à Terre-Neuve comme on l'a fait pour les tableaux du présent bulletin, on en arrive à une estimation assez juste des ventes de carburant consommé sur les voies publiques. Le rapport entre les ventes nettes d'essence et les ventes nettes de carburant diesel se rapproche de 13.6 à 1, c'est-à-dire environ 67.5 millions de gallons d'essence pour 4.9 millions de gallons de carburant diesel. Ce problème n'a pas encore été résolu. Lorsque la situation sera mieux connue, les données chronologiques sur les ventes de carburant à Terre-Neuve seront rectifiées.

Les Tableaux 5 et 7 présentent respectivement les ventes nettes d'essence et celles de carburant diesel, par mois. Il convient de signaler que le chiffre des ventes nettes mensuelles peut être légèrement faussé parce qu'on le calcule en soustrayant des ventes de carburants taxés pour un mois en particulier celles de carburants exempts de taxe pour le même mois.

¹ Excludes aviation and aviation turbo fuels.

² Gross sales of motor and tractor grades only until January 1, 1956 in Newfoundland and Nova Scotia and July 1, 1961 in Prince Edward Island when sales of marked gasoline were included.

³ Gross sales of motor and tractor grades only until January 1, 1958 in New Brunswick and May 1, 1958 in Ontario sales of aviation and turbo fuel were included.

⁴ Liquefied petroleum gases sold for home and industrial heating and power are excluded from Alberta sales since 1963 and Saskatchewan sales since 1968.

¹ Gross sales, less diesel oil exempt from tax or on which tax was refunded.

² Exports were included in net sales prior to 1957.

¹ Northwest Territories included from 1958.

^a Not taxed.

⁵ Included with gasoline.

^c Excludes fuel used for other than highway purposes in all areas except Newfoundland and Quebec.

⁷ Estimated.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.

INTRODUCTION

The present publication represents one volume of a set of four which comprise *The Motor Vehicle* report. These volumes are subtitled as follows:

	Catalogue
Part I — “Rates and Regulations” . . .	53-217
Part II — “Motive Fuel Sales”	53-218
Part III — “Registrations”	53-219
Part IV — “Revenues”	53-220

Part I — “Rates and Regulations” contains information available regarding private passenger and commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and current data on gasoline and other motive fuel taxes, by provinces.

Part II — “Motive Fuel Sales” contains gross and net sales of gasoline and net sales of diesel oil, by provinces and by months.

Part III — “Registrations” includes provincial registrations of the main classes of motor vehicles; a historical table of registrations, by province, and registrations by place of residence.

Part IV — “Revenues” shows provincial government revenues derived from the main classes of motor vehicles and motive fuel taxes. Also provided is a historical table of these revenues and data on the revenues, payments and limitations of the provincial motor vehicle accident claims funds.

Motive Fuel Sales

In this part of the *Motor Vehicle* report, the objective is to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, wherever possible. The resulting net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline, marked gasoline and liquefied petroleum gases. For the years prior to 1960 aviation fuels are included. Diesel oil sales include both No. 1 and No. 2 grades of diesel oil.

La présente publication fait partie d'un groupe de quatre volumes dont l'ensemble porte le titre *Véhicules à moteur*; ce sont:

	Catalogue
Partie I — “Charges fiscales et réglementation”	53-217
Partie II — “Ventes de carburants”	53-218
Partie III — “Registrations”	53-219
Partie IV — “Revenues”	53-220

La partie I fournit des renseignements sur les règlements relatifs aux voitures de tourisme et aux véhicules utilitaires (impôts, prix des permis, accords routiers, taille, poids, sécurité, données actuelles sur les taxes imposées sur l'essence et les autres combustibles, par province).

La partie II donne les ventes brutes et nettes d'essence et les ventes nettes de carburant diesel, par province et pour chaque mois.

La partie III donne des renseignements sur l'immatriculation des principaux groupes de véhicules à moteur, un tableau chronologique des immatriculations, par province, et un tableau des immatriculations, par lieu de résidence.

La partie IV présente le montant des revenus que les provinces tirent des impôts sur les principaux groupes de véhicules à moteur et sur les carburants. Ce volume contient en outre un tableau chronologique de ces revenus et des données sur les cotisations et les fonds d'indemnisation des victimes d'accident d'automobiles.

Ventes de carburants

Le but du présent volume du rapport *Véhicules à moteur* est d'évaluer en gros la quantité totale de carburant acheté au Canada pour être consommé par des véhicules à moteur sur les voies carrossables. Comme il est impossible d'obtenir des renseignements précis qui soient conformes à cette définition, il a fallu, quand c'était possible, soustraire de la quantité totale la quantité de carburant utilisé à d'autres fins. Les données sur les ventes nettes qu'on obtient de la sorte correspondent sensiblement à la quantité réelle de carburant consommé sur les voies routières.

Ventes brutes et nettes

Les chiffres sur la vente de l'essence comprennent l'essence destinée aux véhicules à moteur en général et l'essence pour tracteur, l'essence marquée et les gaz de pétrole liquéfiés. Avant 1960, ces chiffres comprenaient l'essence d'aviation. Les ventes de carburant diesel comprennent les qualités n^o 1 et n^o 2.

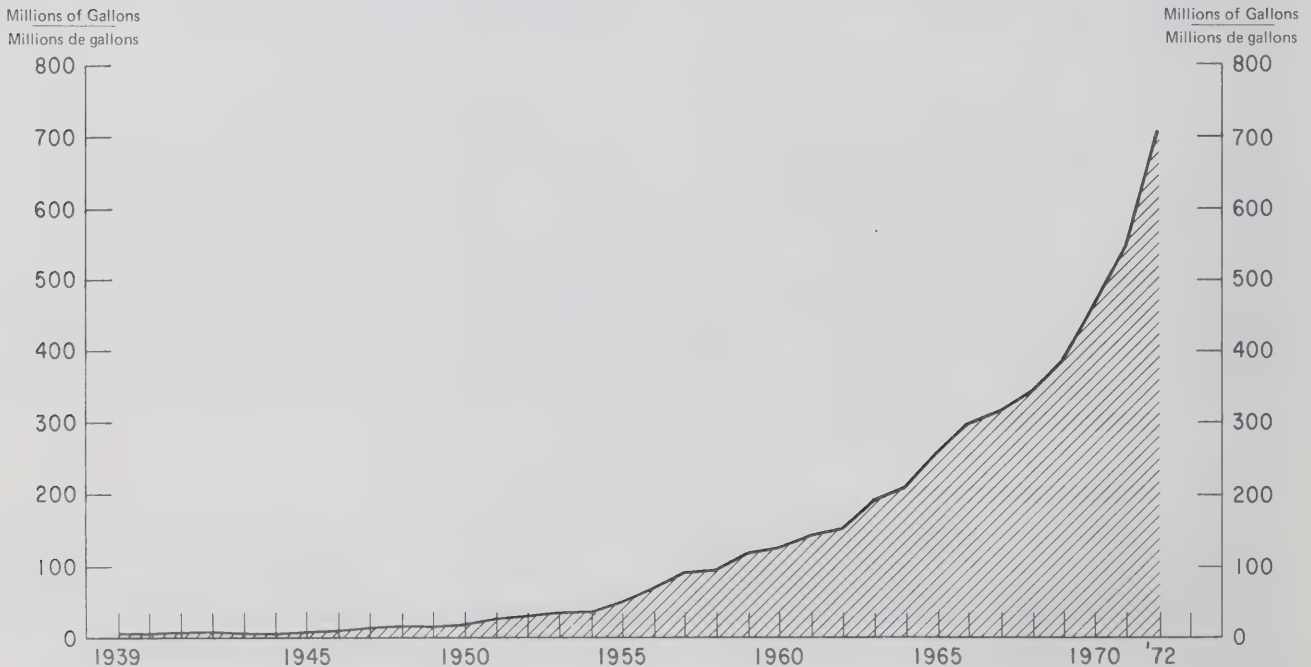

Gross Sales of Gasoline in Canada Showing Taxable Amounts Purchased 1939 - 1972

Ventes brutes d'essence au Canada quantités d'essence imposable achetées 1939 - 1972

Net Sales of Diesel Oil in Canada 1939 - 1972

Ventes nettes de carburant diesel au Canada 1939 - 1972

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

- (a) No separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline,
- (b) No data on diesel oil sales in Nova Scotia, prior to 1964, and
- (c) No information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report *Refined Petroleum Products* (Catalogue 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The *Refined Petroleum Products* report provides total refinery sales figures for all finished petroleum products, while the Motive Fuel Sales report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the *Refined Petroleum Products* report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo fuel. Although some of the other twelve classifications include certain amounts ultimately sold for motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The charts, on page 6, illustrate the growth in the consumption of gasoline and diesel fuel in Canada over the past 32 years.

On obtient les données sur le montant des ventes nettes en soustrayant des ventes brutes:

- (a) les ventes exemptes d'impôt au gouvernement fédéral,
- (b) les ventes exemptes d'impôt aux autres consommateurs et
- (c) les ventes faisant l'objet d'un remboursement.

Les ventes nettes sont donc celles sur lesquelles on a payé un ou plusieurs impôts.

La collecte de données précises a soulevé plusieurs problèmes; en voici quelques uns:

- (a) en Ontario, on n'a pas fait de distinction entre les ventes d'essence d'aviation et les autres types d'essence avant le 1er avril 1963;
- (b) en Nouvelle-Écosse, on n'a pas recueilli de données sur le carburant diesel avant 1964 et
- (c) il n'existe pas de données sur les achats de carburant par le gouvernement fédéral.

Autres données comparables

Malgré la ressemblance apparente qu'il y a entre le montant des ventes nettes du bulletin préparé par la Division de l'industrie et intitulé *Refined Petroleum Products* (catalogue 45-204) et celui des ventes brutes du présent bulletin, la différence qui existe au niveau des définitions rend difficile toute comparaison.

Le bulletin *Refined Petroleum Products* fournit en effet le montant des ventes brutes de tous les produits dérivés du pétrole raffiné tandis que le présent bulletin indique le montant des ventes brutes d'essence destinée aux véhicules à moteur et le montant des ventes nettes de carburant consommé par des véhicules à moteur sur les routes.

Dans le bulletin *Refined Petroleum Products*, les ventes brutes de produits dérivés du pétrole raffiné sont classées en quinze groupes qui englobent presque tous les produits de la distillation du pétrole. La dénomination de ces groupes indique dans quelques cas l'usage que l'on fait des produits (essence d'aviation et essence pour les véhicules à moteur); toutefois, bien que parmi les douze autres groupes il en soit qui renferment des données sur les ventes de carburants, il est impossible d'isoler ces données et d'obtenir des résultats aussi précis que ceux qui sont présentés dans la présente publication.

Résumé

Les graphiques de la page 6 illustrent l'accroissement de la consommation d'essence et de carburant diesel au Canada au cours des 32 dernières années.

Net sales of gasoline and gross sales of gasoline were greater in 1972 than in 1971 in all regions. Net sales of diesel oil showed an increase in all regions except Newfoundland and the Yukon.

Tables 5 and 7 respectively, show net sales of gasoline and diesel oils, by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

January 2, 1974

Les ventes nettes d'essence et les ventes brutes d'essence ont été supérieures à celles de 1971 dans toutes les régions. Les ventes nettes de carburant diesel ont progressé dans toutes les régions sauf à Terre-Neuve et au Yukon.

Les tableaux 5 et 7 présentent respectivement les ventes nettes d'essence et celles de carburant diesel, par mois. Il convient de signaler que le chiffre des ventes nettes mensuelles peut être légèrement faussé parce qu'on le calcule en soustrayant des ventes de carburants taxés pour un mois en particulier celles de carburants exempts de taxe pour le même mois.

Janvier 2, 1974

¹ À l'exception de l'essence d'aviation.

² Ne comprend que les ventes brutes d'essence destinée aux véhicules à moteur en général et d'essence pour tracteurs; les ventes brutes d'essence marquée ne sont incluses qu'à partir du premier janvier 1956, pour Terre-Neuve et la Nouvelle-Écosse, et du premier juillet 1961 pour l'Ile-du-Prince-Édouard.

³ Ne comprend que les ventes brutes d'essence destinée aux véhicules à moteurs en général et d'essence pour tracteurs; les ventes d'essence d'aviation ne sont incluses qu'à partir du premier janvier 1958 pour le Nouveau-Brunswick et du premier mai 1958 pour l'Ontario.

⁴ Respectivement depuis 1963 et 1968, les données relatives à l'Alberta et à la Saskatchewan ne comprennent pas les gaz de pétrole liquéfiés destinés à la production de chauffage de d'électricité pour l'habitation et l'industrie.

⁵ Compris avec le Yukon avant 1966.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

INTRODUCTION

The present publication represents one volume of a set of four which comprise *The Motor Vehicle* report. These volumes are subtitled as follows:

Part	Catalogue
I — Rates and Regulations	53-217
II — Motive Fuel Sales	53-218
III — Registrations	53-219
IV — Revenues	53-220

Part I — “Rates and Regulations” contains information available regarding private passenger and commercial motor vehicle regulations; tax and licence fee rates, reciprocal highway agreements; size, weight and safety regulations and current data on gasoline and other motive fuel taxes, by provinces.

Part II — “Motive Fuel Sales” contains gross and net sales of gasoline and net sales of diesel oil, by provinces and by months.

Part III — “Registrations” includes provincial registrations of the main classes of motor vehicles; a historical table of registrations, by province, and registrations by place of residence.

Part IV — “Revenues” shows provincial government revenues derived from the main classes of motor vehicles and motive fuel taxes. Also provided is a historical table of these revenues and data on the revenues, payments and limitations of the provincial motor vehicle accident claims funds.

Motive Fuel Sales

In this part of the *Motor Vehicle* report, the objective is to provide estimates of the total amount of motive fuel purchased in Canada for use in motor vehicles operating on public roads and highways. As information is not available precisely in accordance with this concept, it has been necessary to obtain estimates by eliminating from gross sales the amount of motive type fuels used for other purposes, wherever possible. The resulting net sales data are considered to approximate the actual amount of motive fuel purchased for use on public roads and highways.

Gross and Net Sales

Gasoline sales figures include motor and tractor grades of gasoline and marked gasoline. For the first time, in this report, sales of liquefied petroleum gases are shown in a separate table (Table 8) for those provinces reporting such sales. Revisions, which exclude li-

La présente publication fait partie d'un groupe de quatre volumes dont l'ensemble porte le titre *Véhicules à moteur*; ce sont:

Partie	Catalogue
I — Charges fiscales et réglementation	53-217
II — Ventes de carburants	53-218
III — Registrations	53-219
IV — Revenues	53-220

La partie I fournit des renseignements sur les règlements relatifs aux voitures de tourisme et aux véhicules utilitaires (impôts, prix des permis, accords routiers, taille, poids, sécurité, données actuelles sur les taxes imposées sur l'essence et les autres combustibles, par province).

La partie II donne les ventes brutes et nettes d'essence et les ventes nettes de carburant diesel, par province et pour chaque mois.

La partie III donne des renseignements sur l'immatriculation des principaux groupes de véhicules à moteur, un tableau chronologique des immatriculations, par province, et un tableau des immatriculations, par lieu de résidence.

La partie IV présente le montant des revenus que les provinces tirent des impôts sur les principaux groupes de véhicules à moteur et sur les carburants. Ce volume contient en outre un tableau chronologique de ces revenus et des données sur les cotisations et les fonds d'indemnisation des victimes d'accident d'automobiles.

Ventes de carburants

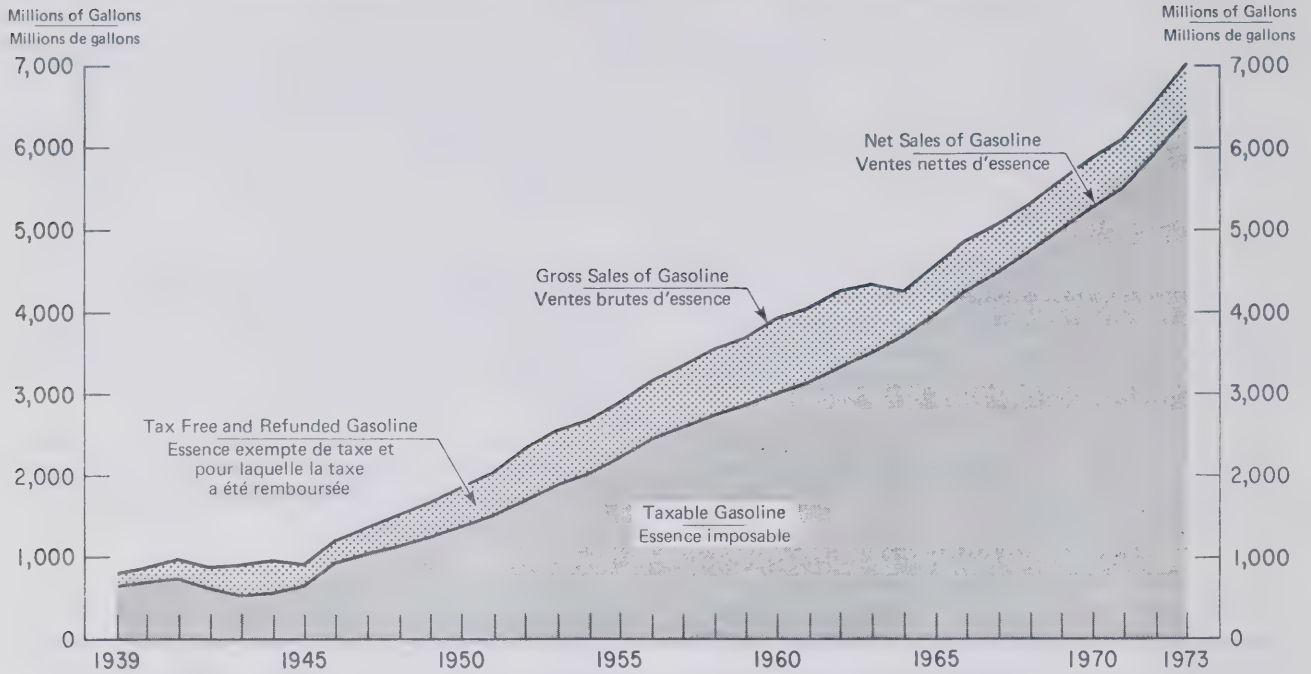

Le but du présent volume du rapport *Véhicules à moteur* est d'évaluer en gros la quantité totale de carburant acheté au Canada pour être consommé par des véhicules à moteur sur les voies carrossables. Comme il est impossible d'obtenir des renseignements précis qui soient conformes à cette définition, il a fallu, quand c'était possible, soustraire de la quantité totale la quantité de carburant utilisé à d'autres fins. Les données sur les ventes nettes qu'on obtient de la sorte correspondent sensiblement à la quantité réelle de carburant consommé sur les voies routières.

Ventes brutes et nettes

Les chiffres de la vente d'essence comprennent l'essence destinée aux véhicules à moteur en général, l'essence pour tracteurs et l'essence marquée. Pour la première fois dans ce bulletin, les ventes de gaz de pétrole liquéfiés sont indiquées dans un tableau séparé (tableau 8) pour les pro-

1939 - 1973**

**Net Sales of Diesel Oil in Canada
1939 - 1973**

**Ventes nettes de carburant diesel au Canada
1939 - 1973**

liquefied petroleum gases, have been made to gross and net sales for 1971 and 1972 to ensure strict comparability with 1973 figures. For the years prior to 1960 aviation fuels are included. Diesel sales include both No. 1 and No. 2 grades of diesel oil.

Net sales data are obtained by deducting the following from gross sales:

- (a) Tax exempt sales to the Federal Government,
- (b) Tax exempt sales to Other Consumers,
- (c) Sales on which refunds were paid.

Net sales are thus defined as sales on which a tax or taxes have been paid in full.

Among the problems associated with the obtaining of exact, rather than estimated, figures for this report are:

- (a) no separation in Ontario, prior to April 1, 1963, between sales of aviation fuels and other types of gasoline;
- (b) no data on diesel oil sales in Nova Scotia, prior to 1964; and
- (c) no information on the percentage of federal purchases of motive fuels that is used on public roads and highways.

Comparability of Data

Despite the apparent relationship between the net sales figures contained in the Industry Division report *Refined Petroleum Products* (Catalogue 45-204) and the gross sales data in this report, the difference in concepts makes a comparison difficult.

The *Refined Petroleum Products* report provides total refinery sales figures for all finished petroleum products, while the Motive Fuel Sales report gives the gross sales of gasoline sold for motive purposes and net sales of gasoline and diesel oil used only as motive fuel on public roads and highways.

In the *Refined Petroleum Products* report, total refinery sales of finished petroleum products are broken down into fifteen classifications covering broad ranges of petroleum distillates. The names assigned to these classifications are in some instances indicative of their main use, such as aviation gasoline, motor gasoline and aviation turbo fuel. Although some of the other twelve classifications include certain amounts

vinces déclarant des ventes de ce genre. On a exclu les ventes de gaz de pétrole liquéfiés des chiffres des ventes nettes et brutes de 1971 et de 1972 afin de permettre des comparaisons avec les chiffres de 1973. Pour les années antérieures à 1960, l'essence d'aviation est incluse. Les ventes de carburant diesel comprennent les ventes de carburant diesel des qualités n° 1 et n° 2.

On obtient les données sur le montant des ventes nettes en soustrayant des ventes brutes:

- a) les ventes exemptes d'impôt au gouvernement fédéral,
- b) les ventes exemptes d'impôt aux autres consommateurs et
- c) les ventes faisant l'objet d'un remboursement.

Les ventes nettes sont donc celles sur lesquelles on a payé un ou plusieurs impôts.

La collecte de données précises a soulevé plusieurs problèmes; en voici quelques uns:

- a) en Ontario, on n'a pas fait de distinction entre les ventes d'essence d'aviation et les autres types d'essence avant le 1er avril 1963;
- b) en Nouvelle-Écosse, on n'a pas recueilli de données sur le carburant diesel avant 1964 et
- c) il n'existe pas de données sur les achats de carburant par le gouvernement fédéral.

Autres données comparables

Malgré la ressemblance apparente qu'il y a entre le montant des ventes nettes du bulletin préparé par la Division de l'industrie et intitulé *Refined Petroleum Products* (n° 45-204 au catalogue) et celui des ventes brutes du présent bulletin, la différence qui existe au niveau des définitions rend difficile toute comparaison.

Le bulletin *Refined Petroleum Products* fournit en effet le montant des ventes brutes de tous les produits dérivés du pétrole raffiné tandis que le présent bulletin indique le montant des ventes brutes d'essence destinée aux véhicules à moteur et le montant des ventes nettes de carburant consommé par des véhicules à moteur sur les routes.

Dans le bulletin *Refined Petroleum Products*, les ventes brutes de produits dérivés du pétrole raffiné sont classées en quinze groupes qui englobent presque tous les produits de la distillation du pétrole. La dénomination de ces groupes indique dans quelques cas l'usage que l'on fait des produits (essence d'aviation et essence pour les véhicules à moteur); toutefois, bien que parmi les douze autres groupes il en soit qui renferment des données sur

ultimately sold for motive purposes, it is not possible to segregate these quantities and arrive at a comparable total.

Summary

The charts, on page 6, illustrate the growth in the consumption of gasoline and diesel fuel in Canada over the past 34 years.

Gross and net sales of gasoline increased over 1971 figures by 8.1% and 8.2% respectively, while the increase in net sales of diesel oil amounted to 21.4%.

Tables 5 and 7 respectively, show net sales of gasoline and diesel oils, by month. It should be noted that, since net monthly sales are calculated by subtracting tax refunded sales during a particular month from taxed sales made during that month, a slight distortion of monthly net sales figures is possible.

January 2, 1975

les ventes de carburants, il est impossible d'isoler ces données et d'obtenir des résultats aussi précis que ceux qui sont présentés dans la présente publication.

Résumé

Les graphiques de la page 6 illustrent l'accroissement de la consommation d'essence et de carburant diesel au Canada au cours des 34 dernières années.

Par rapport à 1971, les ventes brutes d'essence ont augmenté de 8.1 % et les ventes nettes de 8.2 %, les ventes nettes de carburant diesel ont augmenté de 21.4 %.

Les tableaux 5 et 7 présentent respectivement les ventes nettes d'essence et celles de carburant diesel, par mois. Il convient de signaler que le chiffre des ventes nettes mensuelles peut être légèrement faussé parce qu'on le calcule en soustrayant des ventes de carburants taxés pour un mois en particulier celles de carburants exempts de taxe pour le même mois.

¹ Gross sales, less gasoline exempt from tax or on which tax was refunded.

² Exports were included in net sales prior to 1957.

³ Excludes marked gasoline, aviation and aviation turbo fuels from 1967.

⁴ Liquefied petroleum gases excluded 1971, 1972 and 1973.

⁵ Included in Yukon Territories prior to 1966.

¹ Essence d'aviation comprise.

² À l'exception des gaz de pétrole liquéfiés pour 1971, 1972, et 1973 (voir tableau 8).

³ Ne comprend que les ventes brutes d'essence destinée aux véhicules à moteur en général et d'essence pour tracteurs; les ventes brutes d'essence marquée ne sont incluses qu'à partir du premier janvier 1956, pour Terre-Neuve et la Nouvelle-Écosse et du premier juillet 1961 pour l'Ile-du-Prince-Édouard.

⁴ Ne comprend que les ventes brutes d'essence destinée aux véhicules à moteurs en général et d'essence pour tracteurs; les ventes d'essence d'aviation ne sont incluses qu'à partir du premier janvier 1958 pour le Nouveau-Brunswick et du premier mai 1958 pour l'Ontario.

⁵ Respectivement depuis 1963 et 1968, les données relatives à l'Alberta et à la Saskatchewan ne comprennent pas les gaz de pétrole liquéfiés destinés à la production de chauffage de d'électricité pour l'habitation et l'industrie.

⁶ Comprise avec le Yukon avant 1966.

7. Ventes nettes de gaz de pétrole liquéfié par province et territoire, 1974 et 1973	12

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- - amount too small to be expressed.
- ^p preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- ^p nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

INTRODUCTION

THE MOTOR VEHICLE, PART II MOTIVE FUEL SALES 1974

This publication presents annual and monthly sales of gasoline, and annual sales of diesel fuel and liquified petroleum gas. **Net** sales refers to those on which taxes were remitted at road-use rates. "Gross" sales of all **road grades** of gasoline, consists of net sales plus sales for farm, construction, or other off-highway uses and a small amount used on highways by tax-exempt vehicles such as military trucks. Not shown are fuel sales for use by railways, ships and aircraft or for heating or industrial purposes.

Since the **net** figures reported could be checked against, if not actually compiled from, taxation revenue figures, they are believed to represent quite accurately the amount of taxable fuel actually consumed on public roads and streets in Canada.

Changes Effective with this Edition

1. For the first time sales are given in litres as well as in gallons.
2. Diesel fuel sales are provided on an annual basis only, since monthly figures are subject to retroactive rebates and other adjustments which may produce wide fluctuations. Monthly diesel figures have nonetheless been compiled and may be released to individual users upon request.
3. Also for the first time a complete set of figures has been obtained for sales of liquified petroleum gas (LPG) destined for road motor vehicle use. These data include only fuel on which a tax was paid at the full road-use rate.
4. The format of Tables 1, 2 and 3 has been revised to attain greater uniformity with other tables in the presentation of data in this publication.
5. Historical tables have been revised to show data for the latest five years instead of for the latest seven years.

VÉHICULES AUTOMOBILES¹, PARTIE II VENTES DE CARBURANTS, 1974

Cette publication présente les ventes mensuelles et annuelles d'essence et les ventes annuelles de carburant diesel et de gaz de pétrole liquéfié. Les ventes **nettes** sont celles dont la taxe a été acquittée selon le tarif routier de consommation. Les ventes brutes de toutes les **catégories** d'essence consommée (sauf l'aviation) se composent des ventes nettes d'essence utilisée sur les routes et des ventes de carburant utilisé sur la ferme, dans les chantiers de construction ou par d'autres véhicules hors route ainsi que d'une petite quantité d'essence consommée sur les routes par des véhicules spéciaux (exemptés de la taxe), tels les camions militaires. Les ventes de carburant consommé par les trains, bateaux et aéronefs et celui servant à l'industrie ou au chauffage ne figurent pas dans les tableaux.

Étant donné que les chiffres déclarés au titre des ventes **nettes** peuvent être vérifiés, voire, calculés à partir des données sur les recettes fiscales, nous croyons qu'ils représentent de façon assez précise la quantité réelle de carburant taxable consommé dans les rues et sur les routes du Canada.

Modifications par rapport aux éditions précédentes

1. Pour la première fois, les ventes sont exprimées en litres et en gallons.
2. Les chiffres des ventes de carburant diesel ne paraissent que sur une base annuelle, vu que les données mensuelles peuvent faire l'objet de remises rétroactives et autres rajustements susceptibles de provoquer des écarts importants. Les données mensuelles à ce titre sont néanmoins disponibles sur demande aux utilisateurs.
3. Également pour la première fois, nous présentons une série complète de données sur les ventes de gaz de pétrole liquéfié destiné aux véhicules automobiles routiers. Les chiffres portent seulement sur le carburant à l'égard duquel la taxe a été acquittée selon le tarif routier de consommation.
4. La présentation des tableaux 1, 2 et 3 a été revue afin de la rendre plus uniforme avec celle des autres tableaux.
5. Les Tableaux chronologiques ont été modifiés afin de ramener à cinq ans les données qui paraissaient auparavant pour les sept dernières années.

¹ Le terme, "véhicules automobiles" comprend tous véhicules mûs par un moteur à explosion, à réaction, à l'électricité, à gazogène, etc. (exemples: auto, autobus, camion, tracteur, etc.).

Statistical Highlights

Total net sales of gasoline in Canada during 1974 were reported at 6,674 million gallons, up 3.9% from 6,421 million gallons in 1973. Provincial/territorial increases varied from a low of 1.5% in Quebec to a high of 15.0% for the Yukon.

Net sales of diesel fuel in Canada rose 17.6% to 851.8 million gallons in 1974 from 724.6 million gallons in 1973. Liquified petroleum gas (LPG) net sales for road motor vehicle consumption totalled 7.4 million gallons in 1974, the first year national totals for this fuel were compiled.

Gross sales of gasoline, including consumption by off-highway vehicles, totalled 7,308 million gallons, up 4.1% from 7,023 gallons in 1973.

Points saillants

En 1974, les ventes nettes d'essence au Canada se sont élevées à 6,674 millions de gallons, une progression de 3.9 % sur les 6,421 millions de gallons déclarés en 1973. Les hausses par province et territoire ont varié entre 1.5 % (Québec) et 15 % (Yukon).

Les ventes nettes de carburant diesel au Canada ont grimpé de 17.6 % pour s'établir à 851.8 millions de gallons en 1974, comparativement à 724.6 millions de gallons en 1973. Les ventes nettes de gaz de pétrole liquéfié destiné aux véhicules automobiles ont atteint 7.4 millions de gallons en 1974, première année où les ventes de ce carburant étaient calculées à l'échelle nationale.

Les ventes brutes d'essence, y compris celle consommée par les véhicules hors route, se sont élevées à 7,308 millions de gallons, soit 4.1 % de plus que les 7,023 millions de gallons vendus en 1973.

¹ Chiffres estimatifs.

² Les données relatives au gaz de pétrole liquéfié consommé par des véhicules automobiles figurent pour 1970 et les années précédentes.

³ Les ventes d'essence d'aviation étaient comprises dans les chiffres pour 1939, 1949 et 1959, sauf pour le Nouveau-Brunswick et l'Ontario où elles ne portent que sur 1959.

⁴ Ne comprend pas les ventes d'essence marquée en Nouvelle-Écosse pour 1939 et 1949 et dans l'Île-du-Prince-Édouard pour 1939, 1949 et 1959.

⁵ Pour 1939, 1949 et 1959, les chiffres pour l'Alberta et la Saskatchewan comprennent le gaz de pétrole liquéfié non destiné aux véhicules automobiles.

⁶ Carburant diesel compris dans le chiffre pour la Nouvelle-Écosse.

⁷ Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

¹ Les données relatives au gaz de pétrole liquéfié figurent pour 1970 et les années précédentes.

² Comprend une petite partie de l'essence d'aviation.

³ Comprend les exportations.

⁴ Carburant diesel compris dans le chiffre pour la Nouvelle-Écosse.

⁵ Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

- nil or zero.
- - amount too small to be expressed.
- ^p preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- - nombres infimes.
- ^p nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

INTRODUCTION

This publication presents data on annual and monthly sales of gasoline, and annual sales of diesel fuel and liquefied petroleum gas (LPG) used as motive fuel in Canada, for the year 1975.

The term "net sales" refers to those sales of gasoline, diesel and LPG fuel on which taxes were remitted at **road-use** rates. These net figures reported by the provinces and territories are believed to represent, with minor exceptions, the amount of taxable fuel actually consumed on public roads and streets in Canada during 1975.

"Gross sales" of all road grades of gasoline consists of sales of gasoline for farm, construction or other off-highway uses as well as net sales.

Excluded from the tabulations are fuel sales for:

- (i) use by railways, ships and aircraft;
- (ii) heating or industrial purposes.

Effective with this edition, the title of this publication has been changed from *The Motor Vehicle: Part II – Motive Fuel Sales to Road Motor Vehicles – Fuel Sales* to more accurately describe this survey in the context of the overall road transport statistical program. Also commencing with this edition, the historical tables will show data for the latest five years only.

Statistical Highlights

Total net sales of gasoline in Canada during 1975 were reported at 7,002 million gallons (31.8 billion litres), up 4.9% from 6,674 million gallons (30.3 billion litres) in 1974. Provincial and territorial increases varied from a low of 0.3% in British Columbia to a high of 15.6% for the Yukon.

Net sales of diesel fuel in Canada rose 4.3% to 888.3 million gallons (4.04 billion litres) in 1975 from 851.8 million gallons (3.87 billion litres) in 1974.

Liquefied petroleum gas (LPG) net sales for road motor vehicle consumption totalled 7.2 million gallons (32.8 million litres) in 1975, down 3.0% from 7.4 million gallons (33.8 million litres) in 1974.

Cette publication présente des données sur les ventes mensuelles et annuelles d'essence et sur les ventes annuelles de carburant diesel et de gaz de pétrole liquéfié (G.P.L.) servant de carburant à moteur au Canada pour l'année 1975.

L'expression "ventes nettes" désigne les ventes d'essence, de carburant diesel et G.P.L. dont la taxe a été acquittée selon le **tarif routier de consommation**. Ces chiffres déclarés par les provinces et les territoires sont censés représenter, à quelques exceptions près, la quantité réelle de carburant taxable consommé dans les rues et sur les routes du Canada en 1975.

Les "ventes brutes" de toutes les catégories d'essence consommée se composent des ventes d'essence utilisée sur la ferme, dans les chantiers de construction ou par d'autres véhicules hors route en plus des ventes nettes d'essence utilisée sur les routes.

Sont exclues des totalisations les ventes de carburants:

- (i) aux chemins de fer, aux navires et aux aéronefs;
- (ii) à des fins de chauffage ou industrielles.

À partir de cette édition, la publication qui porte actuellement le titre de *Véhicules à moteur – Partie II – Ventes de carburants* s'appellera désormais *Véhicules automobiles – Ventes de carburants* afin de mieux décrire le but de cette enquête par rapport au programme statistique global du transport routier. Aussi, les tableaux chronologiques porteront-ils dorénavant sur les cinq dernières années seulement.

Points saillants

En 1975, les ventes nettes d'essence au Canada se sont élevées à 7,002 millions de gallons (31.8 milliards de litres), une hausse de 4.9 % sur les 6,674 millions de gallons déclarés en 1974 (30.3 milliards de litres). Les gains par province et territoire ont varié entre 0.3 % (Colombie-Britannique) et 15.6 % (Yukon).

Les ventes nettes de carburant diesel au Canada ont grimpé de 4.3 % pour s'établir à 888.3 millions de gallons (4.04 milliards de litres) en 1975, comparativement à 851.8 millions de gallons (3.87 milliards de litres) en 1974.

Les ventes nettes de gaz de pétrole liquéfié destiné aux véhicules automobiles ont atteint 7.2 millions de gallons en 1975 (32.8 millions de litres), une diminution de 3.0 % sur les 7.4 millions de gallons (33.8 millions de litres) enregistrés en 1974.

Gross sales of gasoline, including consumption by off-highway vehicles, totalled 7,664 million gallons (34.8 billion litres) up 4.9% from 7,308 million gallons (33.2 billion litres) in 1974.

Measured in terms of barrels, these sales figures for 1975 are as follows: net gasoline - 200.0 million barrels; gross gasoline - 219.0 million barrels; diesel - 25.4 million barrels and liquified petroleum gas - 206.3 thousand barrels.

Les ventes brutes d'essence, y compris celle consommée par les véhicules hors route, se sont élevées à 7,664 millions de gallons (34.8 milliards de litres), soit 4.9 % de plus que les 7,308 millions de gallons (33.2 milliards de litres) vendus en 1974.

Exprimés en barils, les chiffres de ces ventes pour 1975 sont les suivants: ventes nettes d'essence - 200.0 millions de barils; ventes brutes d'essence - 219.0 millions de barils; carburant diesel - 25.4 millions de barils et gaz de pétrole liquéfié - 206.3 milliers de barils.

¹ The sharp increase in Newfoundland has been attributed to the implementation of tighter controls on the remittance of refunds for off-highway use.

² The large increase in Prince Edward Island has been attributed to the fact that certain refunds for off-highway use did not clear the accounts by year-end 1975.

³ The decreases in Ontario and Manitoba reflect the fact that rebates for off-highway use in 1974 did not clear the accounts until early 1975.

⁴ Components may not add to totals due to rounding.

¹ While the above sales of liquefied petroleum gas were all made at road-use tax rates, it is understood that some of this fuel is eligible for tax rebates as it was consumed in vehicles operated off the public road system. The amount of fuel eligible for such rebates is not available.

² Not taxed at road-use rates.

³ Components may not add to totals due to rounding.

¹ La forte augmentation enregistrée à Terre-Neuve est imputable à la mise en oeuvre de contrôles plus sévères sur les remboursements de taxe relatifs aux carburants consommés hors des voies publiques.

² La hausse appréciable observée à l'île-du-Prince-Édouard s'explique du fait que certains remboursements de taxe relatifs aux carburants consommés hors des voies publiques n'ont pas été comptabilisés à la fin de l'année 1975.

³ Les baisses relevées en Ontario et au Manitoba proviennent du fait que les remises de taxes à l'égard des carburants consommés hors des voies publiques en 1974 n'ont été prises en compte qu'au début de 1975.

⁴ Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

4 932 644	..	2 811 784	6

¹ Bien que les ventes susmentionnées de gaz de pétrole liquéfiés comprenaient toute la taxe de vente pour usage routier, une certaine partie de ce carburant fera l'objet d'un remboursement de taxes puisqu'il a été consommé dans des véhicules utilisés hors du réseau routier public. Nous ne connaissons cependant pas la quantité de carburant touchée par une telle remise.

² Ventes non assujetties au tarif routier de consommation.

³ Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

^r nombres rectifiés.

^x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

INTRODUCTION

This publication presents data on annual and monthly sales of gasoline, and annual sales of diesel fuel and liquefied petroleum gas (LPG) used as motive fuel for road vehicles in Canada, for the year 1976.

The term "net sales" refers to those sales of gasoline, diesel and LPG fuel on which taxes were remitted at road-use rates. These net figures reported by the provinces and territories represent, with minor exceptions, the amount of taxable fuel actually consumed on public roads and streets in Canada during 1976.

"Gross sales" of all road grades of gasoline consists of sales of gasoline for farm, construction or other off-highway uses as well as net sales.

Excluded from the tabulations are fuel sales for:

- (i) use by railways, ships and aircraft;
- (ii) heating or industrial purposes.

Methodology and Data Collection

The statistics were collected from the ten provincial and two territorial government departments responsible for collecting fuel tax and maintaining records of motive fuel sales. Tabulations present data on sales of gasoline, diesel oil and liquefied petroleum gas used for road transport purposes plus gasoline of the type used by road vehicles which was consumed in off-highway activities such as farming, forestry or mining.

Excluded from this report are sales of aviation gasoline, aviation turbo-fuel, marine transport fuels and railway diesel, as well as **diesel and liquefied petroleum gas** sales for use in farming, construction or other off-road activities which are exempt from paying tax at the full road-use rate. Also excluded are all fuels used for heating, industrial power, electricity generation or similar non-transportation purposes.

Data are collected using a report form which is submitted monthly by each province and territory. Follow-up is conducted entirely by telephone.

Data Quality and Limitations

The data furnished are complete and representative. The net sales data are particularly valid since they may be related by the provinces or territories to their tax collections on fuel sold at the higher road-use rate of tax.

Cette publication présente des données sur les ventes mensuelles et annuelles d'essence et sur les ventes annuelles de carburant diesel et de gaz de pétrole liquéfié (GPL) servant de carburant à moteur pour les véhicules routiers au Canada pour l'année 1976.

L'expression "ventes nettes" désigne les ventes d'essence, de carburant diesel et de GPL dont la taxe a été acquittée selon le tarif routier de consommation. Ces chiffres déclarés par les provinces et les territoires sont censés représenter, à quelques exceptions près, la quantité réelle de carburant taxable consommé dans les rues et sur les routes du Canada en 1976.

Les "ventes brutes" de toutes les catégories d'essence consommée se composent des ventes d'essence utilisée sur la ferme, dans les chantiers de construction ou par d'autres véhicules hors route en plus des ventes nettes d'essence utilisée sur les routes.

Sont exclues des totalisations les ventes de carburant:

- (i) aux chemins de fer, aux navires et aux aéronefs;
- (ii) à des fins de chauffage ou industrielles.

Méthodologie et collecte des données

Les statistiques ont été recueillies auprès des ministères des dix provinces et deux territoires responsables de la perception de la taxe sur le combustible et de la tenue de dossiers sur les ventes de carburant à moteur. Les totalisations présentent des données sur les ventes d'essence, de carburant diesel et de gaz de pétrole liquéfié servant au transport routier et de l'essence du genre utilisé par les véhicules hors route sur une ferme ou dans une exploitation forestière ou minière.

Sont exclues de ce bulletin les ventes d'essence d'aviation, de carburéacteur d'aviation, de combustible marin et de carburant diesel destiné aux chemins de fer, ainsi que les ventes de carburant **diesel et de gaz de pétrole liquéfié** destinés à l'agriculture, à la construction et à d'autres activités et à d'autres véhicules hors route qui sont exemptés de payer la taxe selon le tarif routier ordinaire de consommation. Tous les combustibles servant au chauffage, à l'industrie, à la production d'électricité ou à d'autres fins similaires non liées au transport ne paraissent pas dans ce bulletin.

Les données sont recueillies à l'aide d'une formule qui est renvoyée tous les mois par chaque province et territoire. Les rappels se font entièrement par téléphone.

Qualités et limites des données

Les données fournies sont complètes et représentatives. Les chiffres des ventes nettes sont tout particulièrement valides puisque les provinces ou les territoires peuvent les rapprocher des taxes qu'ils perçoivent sur le combustible vendu selon le tarif routier de consommation le plus haut.

Actual sales figures for off-road consumption in British Columbia became available in 1976 for the first time in several years. Therefore, **gross** gasoline sales figures for that province have been restated to bring estimates for off-road consumption in prior years into line with 1976.

Net diesel sales figures are frequently influenced by fluctuations in the payment of rebates to off-road users, who must pay the full road-use tax when they purchase the fuel, then claim a refund later. As rebates are paid, the related gallonage is deleted from the **net** sales figures by the province or territory concerned. Thus, if a large number of claims relating to fuel sold in 1975 are not cleared through the accounts until January 1976, the effect will be to reduce the 1976 sales figure while leaving the 1975 figure high. This is the explanation furnished by Ontario and Prince Edward Island for the fluctuations in their diesel figures in 1975. Similar situations arise with the carry forward of rebate claims on gasoline sales, but these are generally not large enough to cause a noticeable distortion.

Statistical Highlights

Total net sales of gasoline in Canada during 1976 were reported at 7,135 million gallons (32 400 000 000 l), up 1.9% from a restated 7,000 million gallons (31 800 000 000 l) in 1975. Provincial and territorial increases varied from a decrease of 2.3% in the Yukon, to an increase of 7.8% in Alberta.

Net sales of diesel fuel in Canada rose 8.4% to 968.0 million gallons (4 400 000 000 l) in 1976 from a restated 892.8 million gallons (4 060 000 000 l) in 1975.

Liquefied petroleum gas (LPG) net sales for road motor vehicle consumption totalled 7.14 million gallons (32 500 000 l) in 1976, up 2.8% from a restated 6.95 million gallons (31 600 000 l) in 1975.

Gross sales of gasoline, including consumption by off-highway vehicles, totalled 7,680 million gallons (34 900 000 000 l), up 1.2% from a restated 7,592 million gallons (34 500 000 000 l) in 1975.

Measured in terms of barrels, these sales figures for 1976 are as follows: net gasoline - 203.9 million barrels; gross gasoline - 219.4 million barrels; diesel - 27.7 million barrels and liquefied petroleum gas - 204.1 thousand barrels.

Les chiffres de vente réels sur la consommation des véhicules hors route en Colombie-Britannique ont paru en 1976 pour la première fois depuis plusieurs années. Par conséquent, les ventes **brutes** d'essence pour cette province ont été remaniées afin de rapprocher les estimations de la consommation des véhicules hors route des années précédentes avec celles pour 1976.

Les chiffres de vente nets de carburant diesel changent fréquemment par suite des variations dans les remises aux utilisateurs hors route qui doivent payer la taxe entière au moment de l'achat du carburant puis demander un remboursement plus tard. Au fur et à mesure que ces remboursements sont versés, la quantité de carburant correspondante est retranchée des chiffres de vente **nets** par la province ou le territoire en question. Ainsi, si un grand nombre de demandes liées au combustible vendu en 1975 n'est pas traité avant janvier 1976, cela aura pour effet de réduire le chiffre des ventes pour 1976 et de laisser à un niveau élevé celles pour 1975. C'est d'ailleurs là l'explication qu'on fournit l'Ontario et l'Île-du-Prince-Édouard pour les variations observées dans leurs chiffres pour 1975 sur le chapitre du carburant diesel. Des situations semblables existent lorsqu'il y a report des demandes de remboursement sur les ventes d'essence, mais celles-ci ne sont généralement pas assez importantes pour entraîner une distorsion appréciable des chiffres.

Points saillants

En 1976, les ventes nettes d'essence au Canada se sont élevées à 7,135 millions de gallons (32 400 000 000 l), une hausse de 1.9 % sur le chiffre rectifié de 7,000 millions de gallons (31 800 000 000 l) en 1975. Les gains et pertes par province et territoire ont varié entre -2.3 % au Yukon et 7.8 % en Alberta.

Les ventes nettes de carburant diesel au Canada ont grimpé de 8.4 % pour s'établir à 968.0 millions de gallons (4 400 000 000 l) en 1976, comparativement aux 892.8 millions de gallons rectifiés (4 060 000 000 l) de 1975.

Les ventes nettes de gaz de pétrole liquéfié destiné aux véhicules automobiles ont atteint 7.14 millions de gallons (32 500 000 l) en 1976, une hausse de 2.8 % sur les 6.95 millions de gallons rectifiés (31 600 000 l) de 1975.

Les ventes brutes d'essence, y compris celle consommée par les véhicules hors route, se sont élevées à 7,680 millions de gallons (34 900 000 000 l), soit 1.2 % de plus que les 7,592 millions de gallons rectifiés (34 500 000 000 l) de 1975.

Exprimés en barils, les chiffres de ces ventes pour 1976 sont les suivants: ventes nettes d'essence - 203.9 millions de barils; ventes brutes d'essence - 219.4 millions de barils; carburant diesel - 27.7 millions de barils et gaz de pétrole liquéfié - 204.1 milliers de barils.

¹ Decrease in Yukon largely reflects the effects of a prolonged mining strike there.

² Decrease in Northwest Territories reflects reduced roadbuilding and oil exploration activity.

³ Sharp increase in Newfoundland in 1975 has been attributed to the implementation of tighter controls on the remittance of refunds for off-highway use.

⁴ Fluctuations in Prince Edward Island and Ontario reflect the uneven carryforward of refunds for off-highway use from one year to the next.

⁵ Components may not add to totals due to rounding.

¹ La baisse observée pour le Yukon traduit en grande partie les conséquences d'une longue grève dans le secteur de l'exploitation minière.

² La baisse observée dans les Territoires du Nord-Ouest traduit une diminution d'activité au titre de la construction des routes et de l'exploration pétrolière.

³ L'augmentation marquée à Terre-Neuve en 1975 est imputable à la mise en oeuvre de contrôles plus sévères sur le remboursement des taxes de combustible pour les véhicules hors route.

⁴ Les fluctuations enregistrées à l'Île-du-Prince-Édouard et en Ontario s'expliquent par un report inégal des remboursements d'une année à l'autre au titre des ventes nettes de carburant diesel.

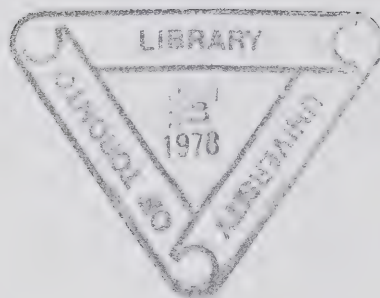

⁵ Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

^r revised figures.

^x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

— néant ou zéro.

- - nombres infimes.

^p nombres provisoires.

^r nombres rectifiés.

^x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

INTRODUCTION

This publication presents data on annual and monthly sales of gasoline, and annual sales of diesel fuel and liquefied petroleum gas (LPG) used as motive fuel for road vehicles in Canada, for the year 1977.

The term "net sales" refers to those sales of gasoline, diesel and LPG fuel on which taxes were remitted at road-use rates. These net figures reported by the provinces and territories represent, with minor exceptions, the amount of taxable fuel actually consumed on public roads and streets in Canada during 1977.

"Gross sales" of all road grades of gasoline consists of sales of gasoline for farm, construction or other off-road uses as well as net sales.

Excluded from the tabulations are fuel sales for:

- (i) use by railways, ships and aircraft;
- (ii) heating or industrial purposes.

Methodology and Data Collection

The statistics were collected from the ten provincial and two territorial government departments responsible for collecting fuel tax and maintaining records of motive fuel sales. Tabulations present data on sales of gasoline, diesel oil and liquefied petroleum gas used for road transport purposes plus gasoline of the type used by road vehicles which was consumed in off-highway activities such as farming, forestry or mining.

Excluded from this report are sales of aviation gasoline, aviation turbo-fuel, marine transport fuels and railway diesel, as well as **diesel and liquefied petroleum gas** sales for use in farming, construction or other off-road activities which are exempt from paying tax at the full road-use rate. Also excluded are all fuels used for heating, industrial power, electricity generation or similar non-transportation purposes.

Data were collected by means of a questionnaire submitted monthly by each province and territory. Follow-up is conducted entirely by telephone.

Data Quality and Limitations

The data furnished are complete and representative. The net sales data are particularly valid since they may be related by the provinces or territories to their tax collections on fuel sold at the higher road-use rate of tax.

Cette publication présente des données sur les ventes mensuelles et annuelles d'essence et sur les ventes annuelles de carburant diesel et de gaz de pétrole liquéfié (GPL) servant de carburant à moteur pour les véhicules routiers au Canada pour l'année 1977.

L'expression "ventes nettes" désigne les ventes d'essence, de carburant diesel et de GPL dont la taxe a été acquittée selon le tarif routier de consommation. Ces chiffres déclarés par les provinces et les territoires sont censés représenter, à quelques exceptions près, la quantité réelle de carburant taxable consommé dans les rues et sur les routes du Canada en 1977.

Les "ventes brutes" de toutes les catégories d'essence consommée se composent des ventes d'essence utilisée sur la ferme, dans les chantiers de construction ou par d'autres véhicules hors route en plus des ventes nettes d'essence utilisée sur les routes.

Sont exclues des totalisations les ventes de carburant:

- (i) aux chemins de fer, aux navires et aux aéronefs;
- (ii) à des fins de chauffage ou industrielles.

Méthodologie et collecte des données

Les statistiques ont été recueillies auprès des ministères des dix provinces et deux territoires responsables de la perception de la taxe sur le combustible et de la tenue de dossiers sur les ventes de carburant à moteur. Les totalisations présentent des données sur les ventes d'essence, de carburant diesel et de gaz de pétrole liquéfié servant au transport routier et de l'essence du genre utilisé par les véhicules hors route sur une ferme ou dans une exploitation forestière ou minière.

Sont exclues de ce bulletin les ventes d'essence d'aviation, de carburateur d'aviation, de combustible marin et de carburant diesel destiné aux chemins de fer, ainsi que les ventes de carburant **diesel** et de **gaz de pétrole liquéfié** destinés à l'agriculture, à la construction et à d'autres activités et à d'autres véhicules hors route qui sont exemptés de payer la taxe selon le tarif routier ordinaire de consommation. Tous les combustibles servant au chauffage, à l'industrie, à la production d'électricité ou à d'autres fins similaires non liées au transport ne paraissent pas dans ce bulletin.

Les données sont recueillies à l'aide d'une formule qui est renvoyée tous les mois par chaque province et territoire. Les rappels se font entièrement par téléphone.

Qualités et limites des données

Les données fournies sont complètes et représentatives. Les chiffres des ventes nettes sont tout particulièrement valides puisque les provinces ou les territoires peuvent les rapprocher des taxes qu'ils perçoivent sur le combustible vendu selon le tarif routier de consommation le plus haut.

Nova Scotia and Alberta recorded large increases in diesel oil sales as a result of oil explorations while the Northwest Territories recorded a decrease in both diesel and gasoline consumption due to a lessening of construction activity.

Net diesel sales figures are frequently influenced by fluctuations in the payment of rebates to off-road users, who must pay the full road-use tax when they purchase the fuel, then claim a refund later. As rebates are paid the related gallonage is deleted from the net sales figures by the province or territory concerned. Thus, those claims relating to fuel sold in 1976 which were not cleared through the accounts until January, 1977, resulted in a reduction in the 1977 sales figure while leaving the 1976 figure high. This is the explanation furnished by Prince Edward Island for the fluctuations in their diesel figures. Similar situations arise with the carry forward of rebate claims on gasoline sales but these are generally not large enough to cause a noticeable distortion.

Statistical Highlights

Total net sales of gasoline in Canada during 1977 were reported at 7,320 million gallons (33 277 000 000 l), up 3% from 7,135 million gallons (32 438 000 000 l) in 1976. Provincial and territorial changes varied from a decrease of 7% in the Northwest Territories, to an increase of 8% in Alberta.

Net sales of diesel fuel in Canada rose 9% to 1,050 million gallons (4 773 000 000 l) in 1977, from 968 million gallons (4 400 000 000 l) in 1976.

Net sales of liquefied petroleum gas (LPG) totalled 6.66 million gallons (30 300 000 l) in 1977, a decrease of 7% from the 7.14 million gallons (32 480 000 l) reported in 1976.

Gross sales of gasoline, including purchases for off-road use, totalled 7,869 million gallons (35 773 000 000 l), up 3% from 7,680 million gallons (34 915 000 000 l) in 1976.

Measured in terms of barrels, the sales figures for 1977 are as follows: net gasoline — 209 million barrels; gross gasoline — 225 million barrels; diesel — 30 million barrels and liquefied petroleum gas — 190 thousand barrels.

Les augmentations considérables enregistrées par la Nouvelle-Écosse et l'Alberta dans les ventes de carburant diesel proviennent en grande partie du secteur de l'exploration pétrolière. En ce qui a trait aux ventes d'essence et de carburant diesel des Territoires du Nord-Ouest, la baisse observée traduit une diminution d'activité au titre de la construction des routes.

Les chiffres de vente nets de carburant diesel changent fréquemment par suite des variations dans les remises aux utilisateurs hors route qui doivent payer la taxe entière au moment de l'achat du carburant puis demander un remboursement plus tard. Au fur et à mesure que ces remboursements sont versés, la quantité de carburant correspondante est retranchée des chiffres de vente nets par la province ou le territoire en question. Ainsi, ces demandes liées au combustible vendu en 1976 qui n'ont pas été traitées avant janvier 1977, ont réduit les chiffres de vente de 1977 tout en laissant à un niveau élevé celles pour 1976. C'est d'ailleurs là l'explication qu'a fourni l'Île-du-Prince-Édouard pour les variations observées dans leurs chiffres sur le chapitre du carburant diesel. Des situations semblables existent lorsqu'il y a report des demandes de remboursements sur les ventes d'essence, mais celles-ci ne sont généralement pas assez importantes pour entraîner une distorsion appréciable des chiffres.

Points saillants

En 1977, les ventes nettes d'essence au Canada se sont élevées à 7,320 millions de gallons (33 277 000 000 l), une hausse de 3 % sur le chiffre de 7,135 millions de gallons (32 438 000 000 l) en 1976. Les gains et pertes par province et territoire ont varié entre - 7 % aux Territoires du Nord-Ouest et 8 % en Alberta.

Les ventes nettes de carburant diesel au Canada ont grimpé de 9 % pour s'établir à 1,050 millions de gallons (4 773 000 000 l) en 1977, comparativement aux 968 millions de gallons (4 400 000 000 l) de 1976.

Les ventes nettes de gaz de pétrole liquéfié destiné aux véhicules automobiles ont atteint 6.66 millions de gallons (30 300 000 l) en 1977, une diminution de 7 % sur les 7.14 millions de gallons (32 480 000 l) de 1976.

Les ventes brutes d'essence, y compris les achats pour usage hors route, se sont élevées à 7,869 millions de gallons (35 773 000 000 l), soit 3 % de plus que les 7,680 millions de gallons (34 915 000 000 l) de 1976.

Exprimés en barils, les chiffres de ventes pour 1977 sont les suivants: ventes nettes d'essence — 209 millions de barils; ventes brutes d'essence — 225 millions de barils; carburant diesel — 30 millions de barils et gaz de pétrole liquéfié — 190 milliers de barils.

¹ Decrease in Yukon largely reflects the effects of a prolonged mining strike there.

² Decrease in Northwest Territories reflects reduced roadbuilding and oil exploration activity.

³ Sharp increase in Newfoundland in 1975 has been attributed to the implementation of tighter controls on the remittance of refunds for off-highway use.

⁴ Fluctuations in Prince Edward Island and Ontario reflect the uneven carry forward of refunds for off-highway use from one year to the next.

⁵ Components may not add to totals due to rounding.

¹ La baisse observée pour le Yukon traduit en grande partie les conséquences d'une longue grève dans le secteur de l'exploitation minière.

² La baisse observée dans les Territoires du Nord-Ouest traduit une diminution d'activité au titre de la construction des routes et de l'exploration pétrolière.

³ L'augmentation marquée à Terre-Neuve en 1975 est imputable à la mise en oeuvre de contrôles plus sévères sur le remboursement des taxes de combustible pour les véhicules hors route.

⁴ Les fluctuations enregistrées à l'Île-du-Prince-Édouard et en Ontario s'expliquent par un report inégal des remboursements d'une année à l'autre au titre des ventes nettes de carburant diesel.

⁵ Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

Introduction

This publication presents data on annual and monthly sales of gasoline, and annual sales of diesel fuel and liquefied petroleum gas (LPG) used as motive fuel for road vehicles in Canada, for the year 1978.

The term "net sales" refers to those sales of gasoline, diesel and liquefied petroleum gas fuel on which taxes were remitted at road-use rates. These net figures reported by the provinces and territories represent, with minor exceptions, the amount of taxable fuel actually consumed on public roads and streets in Canada during 1978.

"Gross sales" of all road grades of gasoline consists of sales of gasoline for farm, construction or other off-road uses as well as net sales.

Excluded from the tabulations are fuel sales for:
Use by railways, ships and aircraft;
heating or industrial purposes.

Methodology and Data Collection

The statistics were collected from the 10 provincial and two territorial government departments responsible for collecting fuel tax and maintaining records of motive fuel sales. Tabulations present data on sales of gasoline, diesel oil and liquefied petroleum gas used for road transport purposes plus gasoline of the type used by road vehicles which was consumed in off-highway activities such as farming, forestry or mining.

Excluded from this report are sales of aviation gasoline, aviation turbo-fuel, marine transport fuels and railway diesel, as well as diesel and liquefied petroleum gas sales for use in farming, construction or other off-road activities which are exempt from paying tax at the full road-use rate. Also excluded are all fuels used for heating, industrial power, electricity generation or similar non-transportation purposes.

Data were collected by means of a questionnaire submitted monthly by each province and territory. Follow-up is conducted entirely by telephone.

Introduction

Cette publication présente des données sur les ventes mensuelles et annuelles d'essence et sur les ventes annuelles de carburant diesel et de gaz de pétrole liquéfié (GPL) servant de carburant à moteur pour les véhicules routiers au Canada pour l'année 1978.

L'expression "ventes nettes" désigne les ventes d'essence, de carburant diesel et de gaz de pétrole liquéfié dont la taxe a été acquittée selon le tarif routier de consommation. Ces chiffres déclarés par les provinces et les territoires sont censés représenter, à quelques exceptions près, la quantité réelle de carburant taxable consommé dans les rues et sur les routes du Canada en 1978.

Les "ventes brutes" de toutes les catégories d'essence consommée se composent des ventes d'essence utilisée sur la ferme, dans les chantiers de construction ou par d'autres véhicules hors route en plus des ventes nettes d'essence utilisée sur les routes.

Sont exclus des totalisations les ventes de carburant:
Aux chemins de fer, aux navires et aux aéronefs;
à des fins de chauffage ou industrielles.

Méthodologie et collecte des données

Les statistiques ont été recueillies auprès des ministères des 10 provinces et deux territoires responsables de la perception de la taxe sur le combustible et de la tenue de dossiers sur les ventes de carburant à moteur. Les totalisations présentent des données sur les ventes d'essence, de carburant diesel et de gaz de pétrole liquéfié servant au transport routier et de l'essence du genre utilisé par les véhicules hors route sur une ferme ou dans une exploitation forestière ou minière.

Sont exclues de ce bulletin les ventes d'essence d'aviation, de carburateur d'aviation, de combustible marin et de carburant diesel destiné aux chemins de fer, ainsi que les ventes de carburant diesel et de gaz de pétrole liquéfié destinés à l'agriculture, à la construction et à d'autres activités et à d'autres véhicules hors route qui sont exemptés de payer la taxe selon le tarif routier ordinaire de consommation. Tous les combustibles servant au chauffage, à l'industrie, à la production d'électricité ou à d'autres fins similaires non liées au transport ne paraissent pas dans ce bulletin.

Les données sont recueillies à l'aide d'une formule qui est renvoyée tous les mois par chaque province et territoire. Les rappels se font entièrement par téléphone.

Data Quality and Limitations

The fuel sales data furnished by provincial and territorial governments reflect the level of economic activity and the constraints imposed by rules and regulations within each province or territory.

On April 1, 1978, the Government of Alberta removed the tax on all types of motive fuel purchased in that province except for aviation gasoline and railway diesel oil. Due to this situation, the 1978 net sales statistics for gasoline, diesel and liquefied petroleum gas represent sales up to April 1, 1978. For the April-December period, the term "net sales" for the province of Alberta does not apply since road-use taxes on fuel had been abolished. Because of late reporting by oil companies and bulk dealers in Alberta and of assessments, some net sales figures are shown for the months of April and May.

Net diesel sales figures are frequently influenced by fluctuations in the payments of rebates to off-road users, who must pay the full road-use tax when they purchase the fuel, then claim a refund later. As rebates are paid, the related gallonage is deleted from the net sales figures by the province or territory concerned. Similar situations arise with retroactive rebate claims on gasoline but these are generally not large enough to cause a noticeable distortion.

Statistical Highlights

Total net sales of gasoline in Canada during 1978 were reported at 7,099 million gallons (32 273 000 000 l), down 3% from 7,320 million gallons (33 277 000 000 l) in 1977. Provincial and territorial changes varied from an increase of 7% in New Brunswick to a decrease of 66% in Alberta due to the removal of the road-use tax on April 1, 1978.

Net sales of diesel fuel in Canada rose 1% to 1,056 million gallons (4 801 000 000 l) in 1978, from 1,050 million gallons (4 773 000 000 l) in 1977.

Net sales of liquefied petroleum gas totalled 5.83 million gallons (26 510 000 l) in 1978, a decrease of 12% from the 6.66 million gallons (30 300 000 l) reported in 1977.

Gross sales of gasoline, including purchases for off road-use, totalled 8,119 million gallons (36 909 000 000 l), up 3% from 7,869 million gallons (35 773 000 000 l) in 1977.

Qualité et limites des données

Les chiffres sur les ventes de combustible fournis par les administrations provinciales et territoriales traduisent l'intensité de l'activité économique et les contraintes imposées par les règlements provinciaux ou territoriaux.

Le 1^{er} avril 1978, le gouvernement de l'Alberta a supprimé la taxe sur tous les types de carburant à moteur achetés dans cette province, sauf l'essence d'aviation et le carburant diesel destiné aux chemins de fer. Par conséquent, les chiffres de 1978 sur les ventes nettes d'essence, de carburant diesel et de gaz de pétrole liquéfié ne représentent que les ventes jusqu'au 1^{er} avril 1978. L'expression "ventes nettes" ne s'applique pas à l'Alberta à partir du mois d'avril à cause de l'abolition de la taxe sur le carburant selon le tarif routier de consommation. Comme certaines sociétés pétrolières et certains marchands en vrac de l'Alberta ont fait parvenir leur déclaration en retard et qu'il a fallu procéder à des estimations, certaines données sur les ventes nettes sont présentées pour les mois d'avril et de mai.

Les chiffres des ventes nettes de carburant diesel changent fréquemment par suite des variations dans les rémissions aux utilisateurs hors route, qui doivent payer la taxe entière au moment de l'achat, puis demander un remboursement plus tard. Au fur et à mesure que ces remboursements sont versés, la quantité de carburant correspondante est retranchée des chiffres des ventes nettes par la province ou par le territoire en cause. Des situations semblables existent lorsqu'il y a report des demandes de remboursement sur les ventes d'essence, mais celles-ci ne sont généralement pas assez importantes pour provoquer une distorsion appréciable des chiffres.

Points saillants

En 1978, les ventes nettes d'essence au Canada ont totalisé 7,099 millions de gallons (32 273 000 000 l), en baisse de 3 % par rapport au chiffre de 7,320 millions de gallons (33 277 000 000 l) observé en 1977. Les gains et pertes par province ont varié entre 7 % au Nouveau-Brunswick et - 66 % en Alberta (en raison de la suppression du tarif routier le 1^{er} avril 1978).

Les ventes nettes de carburant diesel au Canada ont progressé de 1 % pour se fixer à 1,056 millions de gallons (4 801 000 000 l) en 1978, contre 1,050 millions de gallons (4 773 000 000 l) en 1977.

Les ventes nettes de gaz de pétrole liquéfié destiné aux véhicules automobiles ont fléchi de 12 % et elles sont passées de 6.66 millions de gallons (30 300 000 l) en 1977 à 5.83 millions de gallons (26 510 000 l) en 1978.

Les ventes brutes d'essence, y compris les achats pour usage hors route, se sont établies à 8,119 millions de gallons (36 909 000 000 l), en hausse de 3 % sur le chiffre de 7,869 millions de gallons (35 773 000 000 l) enregistré en 1977.

Measured in terms of barrels, the sales figures for 1978 are as follows: net gasoline, 203 million barrels; gross gasoline, 232 million barrels; diesel, 30 million barrels and liquefied petroleum gases, 167 thousand barrels.

Exprimés en barils, les chiffres de vente pour 1978 sont les suivants: ventes nettes d'essence, 203 millions de barils; ventes brutes d'essence, 232 millions de barils; carburant diesel, 30 millions de barils et gaz de pétrole liquéfié, 167 milliers de barils.

¹ Due to the removal of the road-use tax on April 1, 1978 in Alberta, this figure represents 1978 sales up to that date.

² Decrease in Yukon largely reflects the effects of a prolonged mining strike there.

³ Decrease in Northwest Territories reflects reduced roadbuilding and oil exploration activity.

⁴ Sharp increase in Newfoundland in 1975 has been attributed to the implementation of tighter controls on the remittance of refunds for off-highway use.

⁵ Components may not add to totals due to rounding.

¹ Comme l'Alberta a supprimé le tarif routier le 1^{er} avril 1978, ce chiffre tient compte des ventes nettes de 1978 jusqu'à cette date.

² La baisse observée pour le Yukon traduit en grande partie les conséquences d'une longue grève dans le secteur de l'exploitation minière.

³ La baisse observée dans les Territoires du Nord-Ouest traduit une diminution d'activité au titre de la construction des routes et de l'exploration pétrolière.

⁴ L'augmentation marquée à Terre-Neuve en 1975 est imputable à la mise en oeuvre de contrôles plus sévères sur le remboursement des taxes de combustible pour les véhicules hors route.

⁵ Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.

Introduction

This publication presents data on annual and monthly sales of gasoline, and annual sales of diesel fuel and liquefied petroleum gas (LPG) used as motive fuel for road vehicles in Canada, for the year 1979.

The term "net sales" refers to those sales of gasoline, diesel and liquefied petroleum gas fuel on which taxes were remitted at road-use rates. These net figures reported by the provinces and territories represent, with minor exceptions, the amount of taxable fuel actually consumed on public roads and streets in Canada during 1979.

"Gross sales" of all road grades of gasoline consists of sales of gasoline for farm, construction or other off-road uses as well as net sales.

Excluded from the tabulations are fuel sales for: use by railways, ships and aircraft; heating or industrial purposes.

Methodology and Data Collection

The statistics were collected from the 10 provincial and two territorial government departments responsible for collecting fuel tax and maintaining records of motive fuel sales. Tabulations present data on sales of gasoline, diesel oil and liquefied petroleum gas used for road transport purposes plus gasoline of the type used by road vehicles which was consumed in off-highway activities such as farming, forestry or mining.

Excluded from this report are sales of aviation gasoline, aviation turbo-fuel, marine transport fuels and railway diesel, as well as diesel and liquefied petroleum gas sales for use in farming, construction or other off-road activities which are exempt from paying tax at the full road-use rate. Also excluded are all fuels used for heating, industrial power, electricity generation or similar non-transportation purposes.

Data were collected by means of a questionnaire submitted monthly by each province and territory. Follow-up is conducted entirely by telephone.

Introduction

Cette publication présente des données sur les ventes mensuelles et annuelles d'essence et sur les ventes annuelles de carburant diesel et de gaz de pétrole liquéfié (GPL) servant de carburant à moteur pour les véhicules routiers au Canada pour l'année 1979.

L'expression "ventes nettes" désigne les ventes d'essence, de carburant diesel et de gaz de pétrole liquéfié dont la taxe a été acquittée selon le tarif routier de consommation. Ces chiffres déclarés par les provinces et les territoires sont censés représenter, à quelques exceptions près, la quantité réelle de carburant taxable consommé dans les rues et sur les routes du Canada en 1979.

Les "ventes brutes" de toutes les catégories d'essence consommée se composent des ventes d'essence utilisée sur la ferme, dans les chantiers de construction ou par d'autres véhicules hors route en plus des ventes nettes d'essence utilisée sur les routes.

Sont exclus des totalisations les ventes de carburant: aux chemins de fer, aux navires et aux aéronefs; à des fins de chauffage ou industrielles.

Méthodologie et collecte des données

Les statistiques ont été recueillies auprès des ministères des 10 provinces et deux territoires responsables de la perception de la taxe sur le combustible et de la tenue de dossiers sur les ventes de carburant à moteur. Les totalisations présentent des données sur les ventes d'essence, de carburant diesel et de gaz de pétrole liquéfié servant au transport routier et de l'essence du genre utilisé par les véhicules hors route sur une ferme ou dans une exploitation forestière ou minière.

Sont exclues de ce bulletin les ventes d'essence d'aviation, de carburéacteur d'aviation, de combustible marin et de carburant diesel destiné aux chemins de fer, ainsi que les ventes de carburant diesel et de gaz de pétrole liquéfié destinés à l'agriculture, à la construction et à d'autres activités et à d'autres véhicules hors route qui sont exemptés de payer la taxe selon le tarif routier ordinaire de consommation. Tous les combustibles servant au chauffage, à l'industrie, à la production d'électricité ou à d'autres fins similaires non liées au transport ne paraissent pas dans ce bulletin.

Les données sont recueillies à l'aide d'une formule qui est renvoyée tous les mois par chaque province et territoire. Les rappels se font entièrement par téléphone.

Data Quality and Limitations

The fuel sales data furnished by provincial and territorial governments reflect the level of economic activity and the constraints imposed by rules and regulations within each province or territory.

On April 1, 1978, the Government of Alberta removed the tax on all types of motive fuel purchased in that province except for aviation gasoline and railway diesel oil. Due to this situation, the net sales statistics for gasoline, diesel and liquefied petroleum gas for the province of Alberta do not apply since road-use taxes on fuel have been abolished.

Net diesel sales figures are frequently influenced by fluctuations in the payments of rebates to off-road users, who must pay the full road-use tax when they purchase the fuel, then claim a refund later. As rebates are paid, the related gallonage is deleted from the net sales figures by the province or territory concerned. Similar situations arise with retroactive rebate claims on gasoline but these are generally not large enough to cause a noticeable distortion.

Statistical Highlights

Total gross sales of gasoline in Canada during 1979 were reported at 8,429 million gallons (38 319 million litres), up 3.8% from 8,119 million gallons (36 909 million litres) in 1978.

Reported net sales¹ of gasoline decreased 1.32% to 7,005 million gallons (31 846 million litres) in 1979 from 7,099 million gallons (32 273 million litres) reported in 1978.

Net sales¹ of diesel fuel rose 7.7% to 1,138 million gallons (5 172 million litres) in 1979 from 1,056 million gallons (4 801 million litres) in 1978.

Measured in terms of barrels, the sales figures for 1979 are as follows: net gasoline, 200 million barrels; gross gasoline, 224 million barrels; diesel, 33 million barrels and liquefied petroleum gases, 126 thousand barrels.

¹ On April 1, 1978 the road-use tax on motive fuels was removed in Alberta. Since that time the province has not reported "net" sales of fuel.

Qualité et limites des données

Les chiffres sur les ventes de combustible fournis par les administrations provinciales et territoriales traduisent l'intensité de l'activité économique et les contraintes imposées par les règlements provinciaux ou territoriaux.

Le 1^{er} avril 1978, le gouvernement de l'Alberta a supprimé la taxe sur tous les types de carburant à moteur achetés dans cette province, sauf l'essence d'aviation et le carburant diesel destiné aux chemins de fer. Par conséquent, les chiffres sur les ventes nettes d'essence, de carburant diesel et de gaz de pétrole liquéfié ne s'applique pas à l'Alberta à partir du mois d'avril à cause de l'abolition de la taxe sur le carburant selon le tarif routier de consommation.

Les chiffres des ventes nettes de carburant diesel changent fréquemment par suite des variations dans les remises aux utilisateurs hors route, qui doivent payer la taxe entière au moment de l'achat, puis demander un remboursement plus tard. Au fur et à mesure que ces remboursements sont versés, la quantité de carburant correspondante est retranchée des chiffres des ventes nettes par la province ou par le territoire en cause. Des situations semblables existent lorsqu'il y a report des demandes de remboursement sur les ventes d'essence, mais celles-ci ne sont généralement pas assez importantes pour provoquer une distorsion appréciable des chiffres.

Points saillants

En 1979, les ventes brutes d'essence au Canada ont totalisées 8,429 millions de gallons (38 319 millions de litres), en hausse de 3.8 % par rapport au chiffre de 8,119 millions de gallons (36 909 millions de litres) observé en 1978.

Les ventes nettes¹ déclarées d'essence ont diminué de 1.32 % pour s'établir à 7,005 millions de gallons (31 846 millions de litres) en 1979, contre 7,099 millions de gallons (32 273 millions de litres) en 1978.

Les ventes nettes¹ de carburant diesel ont augmenté de 7.7 % pour atteindre 1,138 millions de gallons (5 172 millions de litres) en 1979, comparativement à 1,056 millions de gallons (4 801 millions de litres) en 1978.

Exprimés en barils, les chiffres de vente pour 1979 sont les suivants: vente nette d'essence, 200 millions de barils; ventes brutes d'essence, 224 millions de barils; carburant diesel, 33 millions de barils; et gaz de pétrole liquéfié, 126 milliers de barils.

¹ Depuis le 1^{er} avril 1978, l'Alberta ne perçoit plus la taxe de consommation routière sur les carburants automobiles et ne déclare plus les ventes "nettes" de carburant.

¹ Road-use tax (Alberta only) removed April 1, 1978.

² This figure represents 1978 sales up to April 1, 1978.

³ Decrease in Yukon largely reflects the effects of a prolonged mining strike there.

⁴ Decrease in Northwest Territories reflects reduced roadbuilding and oil exploration activity.

⁵ Sharp increase in Newfoundland in 1975 has been attributed to the implementation of tighter controls on the remittance of refunds for off-highway use.

⁶ Components may not add to totals due to rounding.

¹ Le tarif routier a été supprimé le 1^{er} avril 1978, en Alberta seulement.

² Ce chiffre tient compte des ventes nettes de 1978 jusqu'au 1^{er} avril 1978.

³ La baisse observée pour le Yukon traduit en grande partie les conséquences d'une longue grève dans le secteur de l'exploitation minière.

⁴ La baisse observée dans les Territoires du Nord-Ouest traduit une diminution d'activité au titre de la construction des routes et de l'exploration pétrolière.

⁵ L'augmentation marquée à Terre-Neuve en 1975 est imputable à la mise en oeuvre de contrôles plus sévères sur le remboursement des taxes de combustible pour les véhicules hors route.

⁶ Les chiffres ayant été arrondis, leur somme peut ne pas correspondre aux totaux indiqués.
